

Kawasaki Heavy Industries (7012.T): PII 2Q results read-across: IEEPA tariff refunds booked; business environment improving ex-tariff refunds

Polaris Inc. (PII; Not Covered) announced its 2Q FY12/26 results after the market close on July 28 (JST). Polaris is one of Kawasaki Heavy Industries' competitors in the four-wheel vehicle business, which sits within the powersports & engines (PS&E) segment. We briefly summarize the implications for KHI's PS&E segment.

Exhibit 6: KHI: Side-by-side yoy retail unit trends (moving annual total) vs. Polaris ORV yoy retail unit momentum

Overall market data is sourced from KHI company materials. ORV: Off-Road Vehicle.

What happened?

Polaris' 2Q adjusted sales were \$2,023 million (+9% yoy; +17% organic growth), and its adjusted EBITDA margin was 11.8% (+540 bp yoy). Profit growth was driven by higher volumes, an improved product mix, higher net pricing, and tariff refunds. Even when excluding the \$74 million tariff refund, the company achieved yoy profit growth and margin improvement. Polaris raised full-year guidance, incorporating the strong 1H performance and recorded tariff refunds.

Sales in the Polaris Powersports segment, which includes ORV (Off-Road Vehicles), were \$1,715 million (+17% yoy), with a gross profit margin of 21.4% (+77 bp yoy). ORV retail unit sales were up +5% yoy (overall market: up low-single digits % yoy), and the company noted market share gains for a fifth consecutive quarter. It recorded double-digit yoy growth in utility ORV retail unit sales.

Implications for Kawasaki Heavy Industries

We estimate 1Q3/27 KHI business profits of ¥28.0 bn vs. the LSEG StarMine SmartEstimate of ¥25.9 bn. Factoring in persistently high sales promotion expenses and the impact of tariffs, we forecast PS&E segment profits of ¥7 bn, a decline from ¥8 bn in 1Q3/26. Our estimates do not incorporate any IEEPA tariff refund impact, nor is there any IEEPA tariff refund impact factored into KHI's guidance.

It is not yet clear whether KHI will also receive tariff refund benefits in 1Q3/27, but if it does, this could represent upside to our segment profit estimate. Polaris' management expects flat yoy sales in 2H, with an expected positive impact on net pricing from factors such as lower promotional expenses. If KHI's marketing of new models goes well, sales promotion expenses could come in below our estimates, potentially resulting in upside to our full-year segment profit estimate of ¥26 bn (vs. guidance of ¥30 bn). At the same time, given that Polaris appears to be gaining share in utility ORVs, we will also be watching closely for trends in Kawasaki Motors' market share. We maintain our Neutral rating.

Price Target Risks and Methodology - Kawasaki Heavy Industries (7012.T)

Our 12-month target price of ¥3,500 is based on FY3/28E EV/EBITDA, applying the Japan Aerospace & Defense subsector-average multiple of 14X and a 30% sector-relative discount.

The key upside and downside risks include (1) yen depreciation/appreciation relative to our assumed exchange rate, (2) faster-/slower-than-expected expansion of defense order and revenue momentum, (3) lower-/higher-than-expected cost variability in PS&E, particularly promotional expenses in the North American four-wheeler business,

and (4) faster-/slower-than-expected progress on portfolio restructuring and the turnaround of low-profitability segments, with implications for the conglomerate discount.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock’s total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region’s Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts’ investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs’ involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an

investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.
