

Retail Radar

Jun 24 - Retail Remembers the Dip, Memory (MU) Serves Right

Retail Trading Activity Overview

- This week's global Tech rout did little to deter retail participation; while activity eased from last week's elevated levels, Figure 11, it remained around the 1y median, with resilience in single-stocks (65%ile) offsetting softer ETF inflows (25%ile). The sell-off—led by Korea and semis—created another opportunity for retail investors to add to their Memory exposure, with buying concentrated in MU and SNDK, particularly on weakness this week.
- **Within ETFs, Korea** (e.g. EWY and KORU) saw mixed flows (-4.2z and +2.7z, resp.). **Communication** ETFs Imbalance reached a 15-month low, Figure 9, driven by XLC (-4.2z, Figure 10). **GLD** has been effectively ignored by retail in recent months, but prices plunging below 4000 on Wednesday was a catalyst for stronger outflows (-1.9z day).
- **Within single stocks**, retail interest remained concentrated in the **Mag 7** and **Memory/Semis**. The most-bought names were MU, NVDA, TSLA, SNDK, and MSFT. Notably, buying appeared relatively insensitive to near-term price action, consistent with continued confidence in secular AI/data-center demand—even as near-term catalysts kept volatility elevated. In Mag 7 positioning, our derivatives analysts recommend selling 2-month out of the money puts on GOOGL and MSFT as a target-buy strategy, given both names are down ~11% over the past month, despite the Nasdaq making new highs and fundamentals remaining constructive, [report](#).
- In **Memory** specifically, **demand was strong in MU on Wednesday (8.3z, Figure 2), ahead of its strong earnings announcement that prompted the company's shares to soar over 14% in after-hours trading**. SNDK also continued to see strong inflows over the week (2.4z, Figure 21), although there was minimal activity on Wednesday (-0.5z).
- **Within options**, retail share is at highs, Figure 46, driven by a spike in option volumes in the Communication Sector, Figure 3, which came at the expense of most other sectors, including Tech, Figure 4. The top names by contracts traded were TSLA, NVDA, AAPL, and AMZN.

Single Stock Stories with Elevated Retail Activity

Hedge Funds vs. Retail: High Short Interest Meme Stocks

- **BIRD (\$2.5M sold last week, 1.1z, Figure 18):** The company rebranded on June 17, completing its pivot from a footwear retailer to an AI infrastructure-focused business, and increased its financing facility to \$100 million from \$50 million. Retail interest has picked up since April 2026, with net purchases totaling \$14M, alongside rising short interest now at ~20% of float, up 12% since April 2026.
- **CPB (\$2.0M bought last week, -0.3z, Figure 19):** The stock fell by more than 3% on June 22 after it was removed from the S&P 500. The stock has been on retail investors' radar since January 2025, with purchases accelerating since March 2026 totaling \$100M, amid elevated short interest of ~25% of float, up 5% since March 2026.
- **ODD (\$0.5M sold last week, -0.6z, Figure 20):** The stock rose by more than 6% on June 12 after the company entered into privately negotiated agreements to repurchase \$50 million of 0% exchangeable senior notes due 2030 for \$35 million. Retail investors have net purchased \$35M since August 2025, alongside rising short interest at ~24% of float, up 6% this month.

Macro & Fundamental Stories

- **Semiconductor** stocks are down -6% in the last 3 days (vs. S&P 500 at -1%). Of note, **SNDK** (\$455M bought last week, 3.2z, Figure 21), **MU** (\$258M bought last week, 1.1z, Figure 23), **WDC** (\$37M bought last week, 1.4z, Figure 25), **AMAT** (\$38M bought last week, 2.1z, Figure 27), **LRCX** (\$11.4M bought last week, 0.7z, Figure 29), and **KLAC** (\$30M sold last week, -1.9z, Figure 31) have been among the worst performers, declining between -9% and -14%. **NVDA** (\$510M bought last week, 0.0z, Figure 33) is down -4%.
- **Apogee Therapeutics (APGE, \$6M sold on 6/22, -8.7z, Figure 35)** was up +47% after **AbbVie (ABBV, \$15.4M bought on 6/22, 2.4z, Figure 37)** announced they were acquiring it for ~\$11B. Our analysts see this transaction as a solid fit for AbbVie as it further builds out the company's pipeline in immunology / atopic dermatitis. The deal, which is expected to close in 3Q26, should be moderately dilutive through 2032 ([link](#)). AbbVie's stock traded up +8% on the back of the news.
- **GETY (\$0.7M bought on 6/22, 3.0z, Figure 39):** Getty Images was up +90% on 6/22 after announcing a deal with OpenAI to integrate its digital image libraries into ChatGPT.
- **AMC (\$0.5M sold on 6/23, -0.4z, Figure 41):** AMC Theaters' stock was down -26% on 6/23 after announcing a \$200M cash raise to retire costly debt following a strong opening weekend for "Toy Story 5".

Important Disclosures

Company-Specific Disclosures: J.P. Morgan does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan–covered companies, and certain non-covered companies, by visiting <https://www.jpmm.com/research/disclosures>, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock’s expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts’ coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst’s coverage universe can be found on J.P. Morgan’s Research website, <https://>.

J.P. Morgan Equity Research Ratings Distribution, as of April 04, 2026
