AIDC Power Supply Chain

Grid constraints and SOFC policy tailwinds drive new era for AIDC onsite power

We hosted a well attended expert call on AIDC onsite power solutions to discuss the next phase of global data center infrastructure buildout. The timing of this call is especially relevant, as both government policy and private sector investment in AI and data centers is accelerating in China, the US, and globally, with no signs of slowing down. This is driving a new wave of demand for high-reliability backup and onsite power, and investors are increasingly focused on which companies can deliver the scale, technology, and channel execution needed to capture this expanding TAM. Our expert speaker provided a comprehensive update on the latest trends in data center power demand, technology choices, and competitive dynamics, with particularly bullish read-throughs for the AIDC power supply chain. We maintain OW on **Weichai Power** (2338 HK/000338 CH) and **Yingliu Electromechanical** (603308 CH), as both are well positioned to benefit from the global AIDC cycle, with strong order momentum, technology leadership, and clear paths to scale in gas engines, SOFC, gas turbines and related critical components, in addition to back-up power engines.

- **Grid constraints and power shortages are now a primary driver of demand for onsite power solutions in the US and globally, accelerating the shift toward AIDC engines, gas turbines, and SOFC.** The expert emphasized that US data center power demand continues to surge, but grid interconnection delays and energy shortages are directly impacting project timelines and investment decisions. As a result, data center operators are increasingly turning to onsite solutions—such as gas turbines, gas engines, and SOFC—to bridge the gap and ensure reliable, scalable power. While about 60% of US data centers still rely on the grid, according to the expert, over 20% now use gas turbines for primary power, and the share of gas engines and SOFC is rising quickly. The industry is focused on scaling up supply, and China-based players are well positioned to deliver at scale as the market tightens, in our view.
- **SOFC is emerging as a highly competitive solution, with an expanded TAM and rising policy support in China, positioning it as a key technology for the next phase of data center power.** The expert noted that global SOFC demand is poised to reach 20–30GW by 2030, with China’s policy support accelerating both capacity buildout and cost-down. SOFC’s lifecycle cost is currently \$0.08–0.15/kWh (assuming 8-10 years life cycle), with further cost-down expected as capacity scales and localization increases. SOFC’s flexibility, lower temperature, and rapid start-stop capability are increasingly valued by data center customers, and the technology is now seen as a core part of integrated onsite power solutions. The expert highlighted that China’s government is actively supporting SOFC, similar to the early days of the lithium battery and solar industries, which is expected to drive further TAM expansion and margin opportunity for leading players.
- **Technology and cost curve trends are reshaping the competitive landscape, with integrated solutions and flexibility becoming key differentiators.** The expert observed that as SOFC and gas engine technologies scale, their cost curves are improving, and their flexibility and rapid deployment are increasingly

See page 4 for analyst certification and important disclosures, including non-US analyst disclosures.

valued by data center customers. Gas turbines and gas engines remain competitive for certain applications, but the industry is seeing a clear trend toward integrated solutions that combine SOFC, gas engines, and storage to meet evolving customer needs. The ability to offer a full-stack solution and adapt to different site requirements is becoming a critical advantage for leading players.

- **Competitive threats from ship engine and Korean suppliers are limited, as China-based players retain cost, supply chain, and delivery speed advantages.** While Korean ship engine makers have won some data center orders, the expert believes their impact is limited due to higher costs, longer lead times, and less flexible supply chains. The global power shortage through 2030 will create enough demand for multiple players, but he believes China-based suppliers are best positioned to capture share due to their scale and execution.
- **Weichai Power stands out for its rapid AIDC engine and SOFC capacity ramp, US distribution strategy, and integrated technology leadership.** The expert highlighted that Weichai's AIDC engine shipments are poised to reach 3,500–4,000 units in 2026, with the majority of volume delivered in the second half and a clear focus on scaling both domestic and export capacity. On the SOFC front, Weichai is executing an ambitious capacity ramp-up plan: the company targets 30MW in 2026, 200MW in 2027, 600MW in 2028, and 1GW by 2030. This rapid scaling is supported by a robust supply chain, strong cost management, and deep technical expertise in both gas engines and SOFC. Weichai's SOFC technology, with lower operating temperature and faster response, is also seen as a key differentiator, and its integrated approach to data center power solutions (combining gas engines, SOFC, and storage) is resonating with customers globally, according to the expert.
- **Yingliu's overseas gas turbines lead the growth, domestic adds upside.** In our view, overseas gas turbine demand remains the clearest near-term growth driver for Yingliu as order visibility improves across Siemens Energy, Baker Hughes, Ansaldo Energia and Doosan Enerbility, while MRO provides an added margin lever versus new build parts. Domestic demand is also improving on localization and rising state OEM procurement, which we view as a supportive second leg to the global upcycle. Aero engines should become more meaningful from FY27E-FY28E as customer validation continues to progress (see more in our [initiation](#)).

Companies Discussed in This Report (all prices in this report as of market close on 11 June 2026, unless otherwise indicated)

Weichai Power - A(000338.SZ/Rmb27.57/OW), Weichai Power - H(2338.HK/HK\$34.24/OW), Yingliu Electromechanical - A(603308.SS/Rmb57.39/OW)

Analyst Certification: The Research Analyst(s) denoted by an “AC” on the cover of this report certifies (or, where multiple Research Analysts are primarily responsible for this report, the Research Analyst denoted by an “AC” on the cover or within the document individually certifies, with respect to each security or issuer that the Research Analyst covers in this research) that: (1) all of the views expressed in this report accurately reflect the Research Analyst’s personal views about any and all of the subject securities or issuers; and (2) no part of any of the Research Analyst’s compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the Research Analyst(s) in this report. For all Korea-based Research Analysts listed on the front cover, if applicable, they also certify, as per KOFIA requirements, that the Research Analyst’s analysis was made in good faith and that the views reflect the Research Analyst’s own opinion, without undue influence or intervention.

All authors named within this report are Research Analysts who produce independent research unless otherwise specified. In Europe, Sector Specialists (Sales and Trading) may be shown on this report as contacts but are not authors of the report or part of the Research Department.

Important Disclosures

- **Market Maker/ Liquidity Provider:** J.P. Morgan is a market maker and/or liquidity provider in the financial instruments of/related to Weichai Power - H, Weichai Power - A, Yingliu Electromechanical - A or related entities.
- **Market Maker/ Liquidity Provider (Hong Kong):** J.P. Morgan Securities (Asia Pacific) Limited and/or J.P. Morgan Broking (Hong Kong) Limited and/or an affiliate is a market maker and/or liquidity provider in the securities of Weichai Power - H, Weichai Power - A or related entities and/or warrants or options thereon, which are listed or traded on The Stock Exchange of Hong Kong Limited.
- **Client:** J.P. Morgan currently has, or had within the past 12 months, the following entity(ies) as clients: Weichai Power - H, Weichai Power - A or related entities.
- **Client/Non-Investment Banking, Securities-Related:** J.P. Morgan currently has, or had within the past 12 months, the following entity(ies) as clients, and the services provided were non-investment-banking, securities-related: Weichai Power - H, Weichai Power - A or related entities.
- **Potential Investment Banking Compensation:** J.P. Morgan expects to receive, or intends to seek, compensation for investment banking services in the next three months from Weichai Power - H, Weichai Power - A or related entities.
- **Non-Investment Banking Compensation Received:** J.P. Morgan has received compensation in the past 12 months for products or services other than investment banking from Weichai Power - H, Weichai Power - A or related entities.
- **Debt Position:** J.P. Morgan may hold a position in the debt securities of Weichai Power - H, Weichai Power - A, Yingliu Electromechanical - A or related entities, if any.

Company-Specific Disclosures: J.P. Morgan does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan-covered companies, and certain non-covered companies, by visiting <https://www.jpmm.com/research/disclosures>, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.

Any investment or investment activity to which this material relates is only available to UK relevant persons and will be engaged in only with UK relevant persons. A description of J.P. Morgan EMEA’s policy for prevention and avoidance of conflicts of interest related to the production of Research can be found at the following link: [J.P. Morgan EMEA - Research Independence Policy](#).

U.S.: J.P. Morgan Securities LLC (“JPMS”) is a member of the NYSE, FINRA, SIPC, and the NFA. JPMorgan Chase Bank, N.A. is a member of the FDIC. Material published by non-U.S. affiliates is distributed in the U.S. by JPMS who accepts responsibility for its content.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst’s involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan’s current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own

independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
