China CSSC Holdings - A

Positive profit alert reinforces our earnings thesis;
recent pullback offers an attractive entry point

China CSSC Holdings shares have corrected 9% since 13 July, underperforming the CSI300's 1% decline, despite exceptionally strong June operating data and a positive profit alert released on 14 July. We believe the weakness reflects profit-taking and sector rotation rather than deteriorating fundamentals, presenting an attractive accumulation opportunity. The company now trades at just 13x/11x/8x 2026-28E P/E and 0.5x price-to-orderbook, despite entering the strongest phase of its earnings cycle. Management guided 2Q26 NPAT of Rmb4.4-6.6bn and 1H26 NPAT of Rmb9.2-11.0bn, **implying 2Q26/1H26 NPAT growth of 82-176%/144-191% YoY on the restated merger base, or 178-322%/212-273% YoY versus the originally reported base (pre CSSC-CSIC merger).** While the guidance range brackets our estimates, it reinforces our view that higher-priced contracts secured during 2023-25 are increasingly flowing through deliveries, supporting sustained margin expansion and earnings growth. Reiterate Overweight.

- **Positive profit alert reinforces our earnings thesis; recent pullback offers an attractive entry point.** Relative to our forecasts, the low end of management's guidance is 11% below our 2Q26 estimate and 6% below our 1H26 estimate, while the high end is 35% and 13% above, respectively, leaving our forecasts comfortably within the guided range. We continue to expect higher-priced contract deliveries, improved vessel mix and productivity gains to more than offset the Rmb appreciation headwind already embedded in our forecasts.
- **Delivery mix supports near-term earnings.** As CSSC recognizes revenue upon vessel delivery, the delivery mix is the primary driver of reported earnings. 1H26 deliveries increased 22% YoY by CGT and included 4 LNG carriers, 9 LPG carriers and 4 VLCCs, compared with just 4 LNG/LPG carriers combined in 1H25. The increasing contribution from LNG carriers, LPG carriers and VLCCs – among the industry's highest-ASP and highest-margin vessel classes – should support both ASPs and margins as these vessels flow through revenue recognition.
- **Orderbook quality continues to improve.** 1H26 new order intake doubled YoY by CGT, led by 12 post-Panamax containerships for COSCO Shipping, 15 LNG carriers, 16 LPG carriers (Jiangnan) and 23 VLCCs (Dalian/Beihai). The continued shift towards premium vessel classes reinforces backlog quality and provides multi-year earnings visibility as these contracts progressively enter the delivery schedule.
- **Blue-chip customers continue to place repeat orders.** Recent commercial wins further reinforce CSSC's customer quality. ADNOC awarded four 175,000cbm LNG carriers to Jiangnan Shipyard, while China Merchants Energy Shipping (CMES) ordered five Aframax tankers from Dalian Shipbuilding, extending its long-standing relationship following earlier VLCC orders. Together with the 12 post-Panamax containerships ordered by COSCO Shipping during 1H26, these orders demonstrate CSSC's ability to secure repeat business from leading international and Chinese shipowners

Summary Investment Thesis and Valuation

Investment Thesis

Maintain Overweight. Following the merger of the former “South Ship” (CSSC) and “North Ship” (CSIC) groups, China CSSC Holdings has become the world’s largest listed shipbuilder and the flagship listed platform of China’s state-owned shipbuilding industry. We forecast 26% a NPAT CAGR during 2026-28E as delivery-based revenue recognition delays – but does not reduce – the earnings contribution from higher-priced contracts secured during 2023-25, supporting gross margin expansion from 12.1% in 2025 to 19.8% by 2028E. Combined with productivity improvements, SOE integration and strong cash generation, we believe CSSC is entering the strongest phase of its earnings cycle.

Valuation

We value CSSC using a forward P/E methodology that reflects its long-cycle earnings profile and delayed earnings recognition. At our Rmb45 price target, CSSC trades at only 14.4x 2027E P/E, 1.7x P/B, 0.8x PEG and around a 2% dividend yield, below the 16.3x average for listed global shipbuilders despite stronger earnings growth. CSSC also maintains a Rmb129bn net cash position, equivalent to 48% of market cap, while our valuation excludes upside from Hudong-Zhonghua, further SOE reform and additional productivity improvements.

Investment Thesis, Valuation and Risks

China CSSC Holdings - A *(Overweight; Price Target: Rmb45.00)*

Investment Thesis

Maintain Overweight. Following the merger of the former “South Ship” (CSSC) and “North Ship” (CSIC) groups, China CSSC Holdings has become the world’s largest listed shipbuilder and the flagship listed platform of China’s state-owned shipbuilding industry. We forecast 26% a NPAT CAGR during 2026-28E as delivery-based revenue recognition delays – but does not reduce – the earnings contribution from higher-priced contracts secured during 2023-25, supporting gross margin expansion from 12.1% in 2025 to 19.8% by 2028E. Combined with productivity improvements, SOE integration and strong cash generation, we believe CSSC is entering the strongest phase of its earnings cycle.

Valuation

We value CSSC using a forward P/E methodology that reflects its long-cycle earnings profile and delayed earnings recognition. At our Rmb45 price target, CSSC trades at only 14.4x 2027E P/E, 1.7x P/B, 0.8x PEG and around a 2% dividend yield, below the 16.3x average for listed global shipbuilders despite stronger earnings growth. CSSC also maintains a Rmb129bn net cash position, equivalent to 48% of market cap, while our valuation excludes upside from Hudong-Zhonghua, further SOE reform and additional productivity improvements.

Risks to Rating and Price Target

Risks to our investment thesis include a slower-than-expected margin recovery, an earlier downturn in the shipbuilding cycle, weaker SOE integration benefits, expansion of sanctions or geopolitical restrictions affecting valuation, sustained Rmb appreciation and delays to further SOE reform, including the potential Hudong-Zhonghua injection.

Important Disclosures

- **Market Maker/ Liquidity Provider:** J.P. Morgan is a market maker and/or liquidity provider in the financial instruments of/related to China CSSC Holdings - A or related entities.
- **Debt Position:** J.P. Morgan may hold a position in the debt securities of China CSSC Holdings - A or related entities, if any.

Company-Specific Disclosures: J.P. Morgan does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan–covered companies, and certain non-covered companies, by visiting <https://www.jpmm.com/research/disclosures>, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

China CSSC Holdings - A (600150.SS, 600150 CH) Price Chart

Date	Rating	Price (Rmb)	Price Target (Rmb)
09-Jul-26	OW	35.98	45

Source: Bloomberg Finance L.P. and J.P. Morgan; price data adjusted for stock splits and dividends.
Initiated coverage Jul 09, 2026. All share prices are as of market close on the previous business day.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period. J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock’s expected total return is compared to the expected total return of a benchmark

country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.
