2Q26 revenue/OP beat mainly from strength in camera modules

LG Innotek (LGI) reported 2Q26 revenue of W5.5tn and OP of W246bn, where revenue was higher than both GSe and Bloomberg consensus of W5.1tn, and OP was also higher compared to GSe of W200bn and consensus estimate of W196bn. We believe the revenue beat came from the strength in both camera module and package substrates, especially with the favorable product mix for the former in addition to the F/X tailwinds. We believe the OP beat likely came from the stronger revenue and higher-than-expected camera module margin. Despite the strong results, we lower our 2H26 earnings expectations as we expect limited margin expansion from the camera module business, and lower TP to W860K while maintaining our Neutral rating.

Key takeaways

- **Optics Solution (camera module and 3D sensor):** After a solid beat the business saw in 1Q26, optics revenue/margin in 2Q26 was again better-than-expected likely due to solid iPhone demand, improved product mix, and F/X tailwinds. From the low base in 2Q25, revenue grew by 48% yoy for the business, and we believe margin recovered by more than 4%pt yoy with the significant revenue growth and favorable F/X. We expect the factors that led to the 2Q26 beat to continue to push for a strong yoy revenue growth in 3Q26E, however, we do not expect a material margin improvement both on a qoq and yoy basis as the higher memory cost could start to act as a more material headwind in 2H26E and increasingly offset the positive impact from the higher revenue. Our updated 3Q26E optics revenue is W5.3tn (+18% qoq and +19% yoy), with 3.2% operating margin (vs. 3.6% OPM in 3Q25).
- **Package Solution (package substrates and display solutions):**

LGI's package solution continued to see solid revenue growth on the back of rising demand for high-end substrates and favorable pricing trends. With operating margin improving to low-teens% level which was inline with our expectations, both revenue and profit for the business exceeded our expectations. While we expect the strength in high-value substrates to continue in the coming quarters, revenue growth for the overall business may see some limited upside in the near-term given the already high utilization rate for the business. As such, we also note that the company may see increasing fixed cost burden especially from FC-BGA as it plans to invest a significant amount of capex over the next few years. Our updated 3Q26E package solution revenue is W509bn (+2% qoq and +16% yoy), with 13% operating margin (vs. 7% OPM in 3Q25).

- **Lower 3Q26E OP to W247bn:** We lower 3Q26E OP estimate to W247bn (from W306bn previously), where most of the delta comes from lower camera module revenue and margin estimates.

Lower earnings estimates and TP to W860K; remain Neutral-rated

We lower our 2026E/2027E/2028E EPS estimates by 4%/8%/2% mainly reflecting lower camera module ASP and lower mobility solution revenue/margin estimates. As we refresh our target multiples (from 10.2x to 8.1x for Optics Solution, and from 15.1x to 16.0x for Package Solution) to reflect changes in peer valuation, our 2027E-2028E SOTP based 12m TP is lowered to W860,000 (from W1,000,000 prior). While we appreciate the increasing contribution from the substrate business, camera module continues to drive overall revenue/profit, for which we expect to see limited margin expansion. As such, our earnings estimates during our forecast period are below consensus, and we remain Neutral-rated on the stock. Key risks include higher-/lower-than-expected camera module market share of LGI in Apple.

Price Target Risks and Methodology - LG Innotek Co.

Valuation: We are Neutral-rated on LG Innotek with a 12-month TP of W860,000; our TP is based on a 2027E-2028E EV/EBITDA-based SOTP.

Key risks: higher-/lower-than-expected iPhone shipments, higher-/lower-than-expected camera module market share of LGI in Apple, and higher-/lower-than-expected camera module ASP.

Investment Thesis - LG Innotek

LG Innotek (LGI) manufactures various electronic components and is the top supplier of camera modules for Apple iPhones. Looking into 2026, we expect camera module margin improvement led by reported new feature in iPhone 18 Pro series to lead to improvement in company overall margin; however, see potential smartphone demand downside caused by higher memory costs and stronger KRW over USD as risk factors, hence are Neutral rated on the name. Key risks include higher-/lower-than-expected iPhone shipments, higher-/lower-than-expected camera module market share of LGI in Apple, and higher-/lower-than-expected camera module ASP.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators.
