TAM outlook

Stabilizing industry TAM driven by rising renovation demand offsetting new builds contraction

Following a **20% contraction** in industry TAM (vs. **70% erosion** in market cap for our 4 covered BM companies, Yuhong, Skshu, Vasen and BNBM) between 2021-25, our analysis now suggests a **N-T pivot** with record **pent-up demand** and **increasing secondary sales** to support a stabilizing TAM outlook. In the long run, we anticipate a **return to peak TAM levels**, to provide tailwind for both earnings growth and multiple expansion.

Summary of TAM by four building material sectors

Channel shifts

Aggressive 2C retail expansion, deepened lower-tier/rural penetration, and overseas exploration

The four BM companies are adopting **three primary strategies**: 1) aggressive 2C retail expansion; 2) deepening penetration into lower-tier and rural markets; and 3) broadening product portfolios. We estimate these initiatives will drive almost the **entire topline growth** through 2025-28E, with the greatest impact projected for Skshu. In addition, Yuhong has demonstrated solid execution in international markets.

Price-raw ratio

Improving as one of the benefits from shifting channel to retail business

Building materials prices (especially waterproofing and paint) have already **started to increase** on recent cost inflation but raw materials are starting to rollover **turning that price into margin**. We expect GPM for the four BM companies to **remain stable or expand** through 2027E, driven by favorable mix shift toward the 2C segment, and we forecast a coverage-wide GPM improvement of **1~3pp** from 2025 to end-28E.

Profitability trend

Bottoming out driven by channel shift and SG&A optimization

As the strategic pivots gain traction, we expect profitability and CROCI for the sector to bottom out with average **4pp NM** and **3pp CROCI expansion** for 25A to 28E for the four companies with Skshu positioned for the strongest recovery and Vasen the most modest. Overall, we expect **9-29% EPS CAGRs** for the four names over 2026E-2028E vs. on median -8% in 2025.

Valuation

Our 12-m TPs imply 13%-53% upside for the sector; Buy Yuhong and Skshu

Looking ahead, we project a 12-m forward EV/GCI multiple expansion of **0.1x**, supported by a **1pp** improvement in CROCI relative to 2026E levels, and implying **13%-53% upside** for the sector. For our Buy-rated names (Yuhong and Skshu), we anticipate more pronounced expansion of **+0.3x**, driven by stronger CROCI gains, and implying **47%/53% upside** respectively.

Price Target Risks and Methodologies

Company	Ticker	Ratings	Price Target Risks and Methodologies
Yuhong	002271.SZ	Buy	Our 12-m EV/GCI vs. CROCI-based target price is Rmb16.60 Downside risks: 1) Below-expectation overseas expansion due to miss in production capacity launch, distribution channel developments, and M&A integration synergies; 2) Below-expectation waterproof demand or execution slips in penetrating lower-tier markets; 3) Weaker-than-expected nationwide construction activities; 4) Higher-or-more-prolonged-than-expected increase in raw material prices; 5) Slower-than-expected growth of non-waterproofing businesses; 6) Larger-than-expected impairment losses relating to receivables due from risky developers customers and property collateral assets.
Skshu	603737.SS	Buy	Our 12-m EV/GCI vs. CROCI-based target price is Rmb35.90 Downside risks: 1) Weaker-than-expected execution in new retail businesses development, especially in Mashangzhu store count expansion and deepening Beautiful rural penetration, resulting in retail-channel topline miss; 2) weaker-than-expected product ASP and margins due to intensified competition among large peers and sluggish consumer confidence; 3) slower-than-expected SG&A expense optimization progress due to missteps in redundant salesperson headcount reduction and heavier-than-expected expenditure in promoting fast-growing retail segments; 4) an unexpected surge in raw material (over 80% of Skshu's COGS) prices driven by upstream oil price increase, leading to margin squeeze. Despite years of efforts to improve procurement and inventory management systems, Skshu still has limited bargaining power against suppliers.
Vasen	002372.SZ	Neutral	Our 12-m EV/GCI vs. CROCI-based target price is Rmb9.3 Up/downside risks: 1) Faster-than-expected cross-selling of waterproof coating and other new products, or slower-than-expected "concentric circles" businesses growth; 2) consumer confidence recovery which accelerates home renovation/unleash the pent-up demand for pipe replacement, or more-prolonged-than-expected consumer sentiment weakness resulting in further postponement of household pipe replacement. 3) stronger/weaker-than-expected share expansion in China's plastic pipe market especially in areas outside and lower-tier markets surrounding Vasen's traditionally strong YRD regions; 4) faster/slower-than-expected overseas business expansion, especially in South East Asia; 5) an unexpected drop/surge in raw material prices driven by upstream oil and coal prices decreases/increases; 6) faster-than-expected implementation of urban renewal, especially underground pipeline renovation on the back of intensified central government financial support, resulting in upbeat project-channel order recovery.
BNBM	000786.SZ	Neutral	Our 12-m EV/GCI vs. CROCI-based target price is Rmb22.4 Up/downside risks: 1) higher/lower-than-expected domestic property completions; 2) stronger/weaker-than-expected regional penetration or nationwide capacity expansion by new entrants, leading to more/less fierce price and volume competition; 3) better/worse-than-expected execution of internal realignments of gypsum board brands, in terms of coordinated price hikes and cost efficiency improvements; 4) higher/lower-than-expected revenue growth and margins delivered by new business verticals (waterproofing, coatings, metal framing), subject to stronger/weaker-than-expected cross-selling opportunity capture; 5) higher/lower-than-expected raw material and energy costs, especially in terms of paper which accounts for ~35%–40% of BNBM's gypsum board COGS, and coal and power which together make up ~15%–20% of segment COGS; 6) better/worse-than-expected operational synergies yielded by M&A integrations (especially for the Carpoly brand).

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DA CF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst’s judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst’s published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst’s fundamental equity rating for such stocks, which rating reflects a stock’s return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.fiadocumentation.org/fia/regulatory-disclosures_1/fia-uniform-futures-and-options-on-futures-risk-disclosures-booklet-pdf-version-2018. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Disclosure Appendix

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
