

GCC ONLINE FOOD DELIVERY

Competition and shift to q-commerce outweigh benefits from consolidation: Talabat to Sell from Buy

Intense competition in food delivery has changed unit-economics

The GCC online food delivery market has seen competition shift away from quality (experience, service and value) to promotions following Keeta's market entry (in 4Q24 in KSA and 2H25 in UAE, Qatar and Kuwait), with platforms focusing on gaining/defending market share through heavy discounting and free delivery. While the overall market has grown over the last two years, the competitive landscape has changed. Keeta now commands a one-third market share and has become the second-largest player in KSA and Kuwait, while also emerging as a fast-growing No.3 player in the UAE and Qatar. This intense competition has led to weaker unit-economics for the online food delivery platforms.

Rapid expansion into q-commerce supports platform diversification but may dilute margins and increase capital intensity medium term

In response to declining market share and profitability in food delivery, the incumbents are investing heavily in quick(q)-commerce (especially grocery and retail) to build customer loyalty and capture a larger share of consumer wallet. This strategy allows operators to establish an early presence in a fast-growing and still underpenetrated market. Greater scale should support higher average order values (AOV) and improved store through-put, which is important for margins in these verticals. However, we note two structural challenges: (i) q-commerce is generally a low-margin business, characterised by heavy promotions in early years to build adoption, and (ii) it can be capital intensive (investment in dark stores in the case of 1P models) to build out the network. As a result, we believe margins and returns are likely to come under pressure over time as the business mix shifts increasingly toward q-commerce.

Recent consolidation speculation has raised expectations of a more rational competitive environment but we believe Keeta's strategy will shape sector profitability

We have started seeing consolidation in the industry with Jahez acquiring Snoonu (in Qatar) in 2025 and announcing a strategic partnership with Noon (in Saudi) in 1Q26. In late May, Uber (which increased its stake in Careem to c.63% in June 2026, the No.2/3 player in food delivery across Talabat's core markets) expressed interest in acquiring Delivery Hero (Talabat's largest shareholder with an 80% stake). Following

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. this news, there have also been reports of DoorDash exploring Delivery Hero's Middle East operations, while Saudi start-up Ninja is also reported to have shown interest in Delivery Hero's Saudi operations and certain Talabat operations. The share prices of both Jahez and Talabat reacted positively to these developments, reflecting market expectations that consolidation could reduce competition intensity and ease pressure on profitability. While consolidation would be driven by acquirers' strategic ambitions to expand their Middle East presence and capture synergies (for example, in Uber's case), in our view the sector's profitability outlook will continue to be challenged by Keeta's aggressive expansion plans across GCC markets. Until that dynamic changes, competitive pressures are likely to weigh on profitability.

Updating estimates; adding M&A premiums to valuations; downgrade Talabat to Sell

We update our estimates for both Talabat and Jahez to incorporate current operating dynamics and shifts in business mix. We also update our valuation methodology to EV/EBITDA vs. EBITDA growth (vs. sales growth) to capture the divergence between top-line and EBITDA growth. We introduce an M&A component within our valuation framework to capture the potential for the shares to trade higher on consolidation expectations. While both Talabat and Jahez have outperformed amid expectations of potential industry consolidation, we expect overall fundamentals to remain challenging in the medium term given intense competition and ongoing investment in q-commerce. Our revised 12m PT for Talabat is AED 1.07, implying 12% downside, and we downgrade the shares to Sell from Buy. We remain Neutral on Jahez, with our new SR 13.4 price target implying 2% downside.

We would like to thank Beom Su Choi for his contribution to the note.

Note pricing in this report is as of June 30, 2026

Keeta's expansion in GCC has shifted competition from quality to subsidy

GCC's online food delivery market has grown by c.20%pa over the last two years as consumers continue to shift towards online food ordering. This growth has been driven by: (i) an increase in TAM, with mid-low income consumers increasingly adopting online food delivery, supported by significant promotions (discounts and free delivery), and (ii) some substitution away from dine-in consumption, especially where consumers look to trade down amid pressure on disposable incomes. We believe Keeta's entry into the GCC market has contributed to the acceleration of online food delivery adoption as its aggressive promotions and discounting have driven pricing down across the industry. Keeta has replicated its success in the Hong Kong market by gaining a strong presence in Saudi Arabia and Kuwait, where it is now the second-largest player with a one-third market share, while also expanding rapidly in the UAE and Qatar.

Unit-economics for incumbents are deteriorating as Keeta continues to expand in GCC
Keeta's entry in GCC has shifted competition away from quality (selection, service and value) to promotions (including aggressive discounts, free delivery) which has impacted the unit-economics in the food delivery segment. As a result, food delivery incumbents have seen significant margin compression and cash burn. We expect these pressures to prevail in the near term as Keeta remains focused on market-share expansion through aggressive promotions. While Keeta has recently discontinued discount vouchers and introduced delivery fees in some markets (subject to order value thresholds), it continues to invest heavily in marketing (to create awareness) and customer incentives (to provide value to customers) which, in our view, will remain a key overhang on industry profitability.

Exhibit 6: Jahez KSA: Sharp decline in Adj. EBITDA contribution reflects weaker unit-economics

Accelerating quick-commerce to build scale in multi-vertical eco-systems; adds pressure on margin and FCF

To defend market share, incumbents such as Talabat and Jahez are accelerating investment in quick commerce (especially grocery and retail) to build multi-vertical ecosystems that drive customer loyalty, reduce churn, capture a higher share of the customer basket and optimise logistics networks. Early entry and scale can support higher AOVs and greater store throughput, both of which are important drivers of margin in these verticals. While q-commerce remains significantly underpenetrated across the region at low single digits with prospects for a mid-teens growth outlook, profitability is structurally lower than in food delivery given the inherently low-margin nature of grocery retail. In addition, the business is more asset-intensive, requiring investment in dark stores and inventory, which weighs on cash flow generation and profitability.

Industry consolidation expectations building, but we believe Keeta's strategy will shape sector profitability

We have started seeing consolidation in the industry, with Jahez acquiring Snoonu (in Qatar) in 2025 and announcing a strategic partnership with Noon (in Saudi) in 1Q26. In late May, Uber (which increased its stake in Careem in June 2026 to c.63%, the No.2/3 player in food delivery across Talabat's core markets) expressed interest to acquire Delivery Hero (Talabat's largest shareholder with an 80% stake). Following this news, there have also been reports of DoorDash exploring Delivery Hero's Middle East operations, while Saudi start-up Ninja is also reported to have shown interest in Delivery Hero's Saudi operations and certain Talabat operations. The share prices of both Jahez and Talabat reacted positively to these developments, reflecting market expectations that consolidation could reduce competition intensity and ease pressure on profitability. While consolidation would be driven by acquirers' strategic ambitions to expand their Middle East presence and capture synergies (for example, in Uber's case), in our view the sector's profitability outlook will continue to be challenged by Keeta's aggressive expansion plans across GCC markets. Until that dynamic changes, competitive pressures are likely to weigh on profitability.

Keeta in Hong Kong: When entering the GCC, Keeta drew from its experience in Hong Kong, its first international market. There, the company quickly established itself as the second-largest player following its launch in May 2023. With its strategy of growth-before-profit and investment by parent Meituan, Keeta launched aggressive pricing promotions and offered high salaries to drivers, which enabled it to capture a 43% share of the order market within its first year of operations, making it the largest food delivery company by order volume and the second-largest by GMV (32%). Due to aggressive competition, Hong Kong is now a two-player market between Keeta and FoodPanda (owned by Delivery Hero) following the exit of Deliveroo in 2025. However, we note that after gaining the scale and market share, Keeta has begun to evolve its strategy. While customer acquisition remains supported by promotional activity, the company appears to have shifted its focus from aggressive price competition toward building a more sustainable ecosystem, culminating in its first reported profit in October 2025.

Keeta in KSA: Keeta's second international expansion was in Saudi Arabia in September 2024, mainly through tier-2 cities, while expanding into tier 1 cities in 1Q25. Similar to Hong Kong, it started with an aggressive pricing strategy — SR 100 voucher for customers on first order (to be used over the next few orders), free delivery, 30-minute delivery guarantees and exclusivity with restaurants. According to Google Trends data, Keeta has a c.37% market share in Saudi Arabia. While Keeta has pulled back some of its early promotions and introduced delivery fees, it remains aggressive on pricing and marketing spend. Although Keeta has acquired a c.37% MAU market share, we believe its GMV market share is still in mid-20% given lower AOV, higher discounts and its initial target customer base which is less affluent. As a result, we believe Keeta is likely to maintain elevated promotional intensity as it seeks to further expand its GMV market share. Consistent with its Hong Kong playbook, we would expect competitive pressures to remain elevated until the company achieves a more substantial position in the market.

Exhibit 27: Keeta aggressively took market share in Hong Kong post its launch in May 2023, driven by significant promotional activity

Source: Sensor tower

Exhibit 28: In all regions, Keeta has rapidly taken market share within the first few months post its launch, supported by aggressive promotions and pricing

Source: Sensor tower

Talabat: Competition and shift to q-commerce outweigh benefits of potential consolidation; down to Sell

Stock has outperformed on growing expectations of industry consolidation

Talabat's stock has outperformed the broader market over the last month, driven by expectations of industry consolidation following news that Uber (which increased its stake to c.63% in Careem in June 2026, the No.2/3 player in food delivery across Talabat's core markets) was interested in acquiring Delivery Hero (Talabat's largest shareholder with an 80% stake). Following this news, there have also been reports of DoorDash exploring Delivery Hero's Middle East operations, while Saudi start-up Ninja is also reported to have shown interest in Delivery Hero's Saudi operations and some operations of Talabat. Against this backdrop, Talabat's shares have rallied approximately 80% from their March 2026 lows, reached during the US-Iran conflict, and are up 46% since mid-May, when reports of Uber's interest in Delivery Hero first emerged.

Exhibit 29: Talabat is up c.80% since the March low reached during the Middle East conflict, outperforming a flat broader market

Source: LSEG Data & Analytics

Competition and mix shift towards q-commerce to weigh on earnings

We believe the underlying food delivery market will remain competitive as Keeta continues to focus on market share gains through aggressive pricing and promotions, which we expect to weigh on margins. Unlike in Hong Kong and Saudi, where Keeta rapidly established itself as the No.2 player within its first year of operations, its expansion across Talabat's market has been mixed (capturing a one-third market share in Kuwait to achieve the No.2 position player but remaining <20% market share in UAE and Qatar). In our view, this is likely to incentivize continued aggressive competition as Keeta seeks to strengthen its position in other GCC markets.

At the same time, we believe Talabat's shift towards q-commerce will support top-line growth but at lower margins (structurally lower-margin business, increased opex to build-out the q-commerce vertical, increased investments in dark stores), implying EBITDA growth below historical average levels.

Exhibit 30: Google Trends data suggests that Talabat's market share has declined across its GCC markets

We now include an M&A premium in our valuation methodology

We update our valuation methodology to incorporate an M&A component to capture the potential for the shares to trade higher on consolidation expectations. Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign an M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines, we incorporate an M&A component into our target price. An M&A rank of 3 is considered immaterial and therefore does not factor into our price target and may or may not be discussed in research. For companies with an M&A rank of 1, we weight our M&A valuation at 30% in our price target, while for companies with a rank of 2, we weight this component at 15%. In this context, we have increased Talabat's M&A ranking to 2, and weigh our M&A value at 15% within our price target methodology.

Valuation framework: 15% weight to our M&A-based valuation and 85% to our EV/EBITDA vs. EBITDA growth metric

To derive our M&A valuation for Talabat, we look at past M&A transactions within online food delivery space globally since 2020 and use a 16.0x EV/EBITDA multiple. We observe a strong relationship between transaction multiples and revenue growth across historical M&A transactions in the online food delivery sector. We use this relationship to derive our M&A target multiple for Talabat based on its 2027 revenue growth, while applying a discount to reflect differences in the current operating environment, including (i) slower growth in Talabat's online food delivery business (which we now expect at high-single digit), (ii) more modest EBITDA growth driven by increased competition and (iii) higher capex intensity and operating risk from the ongoing shift toward q-commerce.

Exhibit 35: Historical M&A transactions since 2020

Transaction multiples refer to FY1 Consensus/company announced multiples

Year	Acquirer	Target	TTM EV (\$)	EV/EBITDA	EV/Revenue	EV/GMV	Revenue growth

Source: Company data, Goldman Sachs Global Investment Research, LSEG Data & Analytics

We also shift our methodology for the fundamental valuation component in our price target (weighted 85%) from EV/EBITDA adjusted for sales growth to EV/EBITDA adjusted for EBITDA growth primarily to account for the divergence in revenue and EBITDA growth relative to historical levels. As a result, our target multiple changes from 15.0x to 10.2x.

Exhibit 36: Our target multiple for Talabat of 10.2x is based on a regression of EV/EBITDA multiples against EBITDA growth for global food delivery peers

*consensus data

Source: Company data, Goldman Sachs Global Investment Research, LSEG Data & Analytics

On our M&A methodology, we derive a valuation per share of AED 1.51 based on a 16.0x EV/EBITDA multiple applied to 2027 estimates. Our EV/EBITDA adjusted for EBITDA growth methodology implies a valuation per share of AED 0.99 based on 10.2x 2027E EV/EBITDA.

As a result of the change in valuation approach adjusted to EBITDA vs. EBITDA growth (85% weight), the addition of an M&A component (15% weight), and our estimate changes (discussed later), our target price decreases by 37% to AED 1.07 from AED 1.69 implying 12% potential downside vs. average upside for our coverage of 33%. We downgrade the stock to Sell from Buy. We note that the reduction in our target price is driven primarily by lower earnings estimates and a weaker growth outlook for Talabat. A smaller portion of the decline reflects our shift in valuation methodology from sales growth to EBITDA growth, as we believe investors are likely to place greater emphasis on profitability given the current competitive environment.

Since being added to the Buy List on January 9, 2025, the shares are -27% vs the MSCI EM EMEA +26%, largely on the back of concerns around competitive pressure from Keeta's expansion into Talabat's market in GCC.

Exhibit 37: We arrive at a PT of AED1.07 using 10.2x EV/EBITDA adjusted to EBITDA growth (85% weight) and 16.0x M&A premium (15% weight)

We update our estimates to account for management guidance and recent operating trends

We update our estimates to incorporate management guidance, recent operating trends and 1Q26 results. Our revenue estimates increase by an average 10% for FY26-29E, driven by growth in the grocery and retail business. However, we reduce our EBITDA estimates by 9.5% on average due to the shift to lower-margin business. Our net income estimates decrease by 31% on average, also reflecting an increase in depreciation and finance charges (due to financial leases on dark stores).

Exhibit 38: Our lower earnings estimates reflect new guidance and trends in the sector, namely (i) the shift in strategy towards G&R, (ii) increased competition in F&B and (iii) weaker consumption

US\$ mn	2026E	2027E	2028E	2029E

Key risks:

Below we highlight the key risks we see to our price target and investment thesis. If any or all of these risks were to materialize, we could consider a more positive stance on the shares.

- **Easing of competition in the food delivery business:** While Talabat holds a leading position across all of its operating markets, the food delivery sector is highly competitive, with players such as Deliveroo, Careem, Noon and local entrants vying for market share. With the entry of Keeta in Talabat's market from 2H25, price wars and aggressive discounting by competitors have impacted Talabat's profitability. An easing of competition and rationality of pricing could be an upside to our view.
- **Lower customer and restaurant acquisition spend:** The entry of new competitors and changes in the competitive landscape is driving higher spend on customer acquisition and retention, further pressuring margins. A less competitive environment than we expect could reduce customer and restaurant acquisition costs, providing upside to margins.

- **Profitable expansion in new verticals:** While Talabat has diversified into grocery and retail, these verticals are still under-penetrated in the MENA region, and achieving profitable scale presents a challenge. tMarts and Local Shops have shown robust growth, but the risks associated with operational inefficiencies, such as inventory management, logistics costs, and cold chain requirements, will weigh on margins in the grocery segment, in our view. Lower-than-expected costs in G&R division would be a key upside risk to our view.
- **Successful regional expansion:** As Talabat continues its geographical expansion, particularly into non-GCC countries such as Egypt and Iraq, there is a risk of margin dilution given lower purchasing power and order frequency in these markets. Non-GCC countries currently lag in terms of order volume and customer frequency, which we believe could weigh on group margins as Talabat scales its operations. However, better-than-expected margins and profitability in newer geographies would represent a key upside risk to our forecasts.
- **Regulation:** Talabat operates across eight MENA markets, each with its own regulatory environment. In some GCC markets (including Dubai, Saudi, Kuwait), regulators have announced laws to curb practices such as predatory pricing, exclusivity and differential take rates with merchants. Effective implementation and enforcement of the laws could reduce pricing pressure and ease competition in the market.
- **M&A risk:** While we have incorporated M&A in our valuation to arrive at a 12M price target, any acquisition occurring at a higher multiple than that implied in our methodology would drive upside risk to our valuation.

Jahez: Search for stability continues; remain Neutral

Lowering estimates on competitive pressure

Following significant market-share erosion (based on MAU data as per Sensor Tower), Jahez has now fallen to the No.3 position in Saudi Food delivery space. While the company is expanding geographically through the acquisition of Snoonu and new verticals (mainly grocery and retail), we believe defending its market share in the Saudi online food delivery segment while stabilizing profits remains challenging amid Keeta's aggressive expansion strategy. As a result, we update our estimates to reflect 1Q26 results, management guidance and recent operating trends. We raise our revenue estimates by an average 16.5% for FY26-29E mainly to incorporate the Snoonu acquisition and expansion in the grocery and retail business. However, we lower our EBITDA estimates by 30% on average for FY26-29E on account of weaker-than-expected margins. We also lower our net income forecasts by 66% on average for FY26-29E, also reflecting lower finance income and an increase in depreciation cost following the acquisition of Snoonu.

Exhibit 41: We cut our EBITDA/NI estimates materially; however, our top-line estimates increase due to the Snoonu acquisition

Valuation: Including M&A framework in our valuation approach

Jahez is up 32% from the April lows on the back of expectations of consolidation in the industry. Jahez acquired Snoonu in 2025 and has announced a strategic partnership with Noon in 2026. In addition, as discussed earlier, there have been press reports around potential M&A activity in the region within the food delivery space. As a result, we now incorporate an M&A premium in our valuation to capture the potential for Jahez shares to trade higher on consolidation expectations.

Exhibit 44: Jahez is up c.32% from April lows on the back of expectations of consolidation in the industry

Source: LSEG Data & Analytics

As with Talabat, we update our valuation methodology to incorporate M&A component within our valuation framework. We assign Jahez an M&A ranking to 2, and weigh our M&A value at 15% within our price target methodology.

Valuation framework: 15% weight to our M&A-based valuation and 85% to EV/EBITDA vs EBITDA growth

To derive our M&A valuation for Jahez, we look at past M&A transactions within online food delivery space globally since 2020 and use a 13.0x EV/EBITDA multiple. We observe a strong relationship between transaction multiples and revenue growth across historical M&A transactions in the online food delivery sector. We use this relationship to derive our M&A target multiple for Jahez based on its 2027 revenue growth while applying a discount to reflect capture differences in the operating environment, including (i) intense competition from Keeta in the Saudi Food delivery space resulting in slower growth and (ii) pressure on margins from competition and the shift to q-commerce segment.

Exhibit 45: Historical M&A transactions since 2020

Transaction multiples refer to FY1 Consensus/company announced multiples

Year	Acquirer	Target	TTM EV (\$)	EV/EBITDA	EV/Revenue	EV/GMV	Revenue growth
2020	Takeaway.com	JE	7.8	30.7x	8.0x	1.2x	28.0%
2020	Uber	Postmates	2.7	NA	5.3x	1.0x

Global median				17.1x	4.3x	0.7x	

Global Range and Median is excluding Uber's offer for Delivery Hero

Source: Company data, Goldman Sachs Global Investment Research, LSEG Data & Analytics

We also shift our methodology for the fundamental valuation in our price target (weighted 85%) from EV/EBITDA adjusted for sales growth to EV/EBITDA adjusted for EBITDA growth primarily to account for the divergence in revenue and EBITDA growth relative to history. As a result, our target multiple changes from 16.0x to 11.1x.

Exhibit 46: Our target multiple for Jahez of 11.1x is based on a regression of EV/EBITDA against EBITDA growth for global good delivery peers

* consensus data

Source: Goldman Sachs Global Investment Research, FactSet, LSEG Data & Analytics

On our M&A methodology, we derive a valuation per share of SR 15.2 based on a 13.0x EV/EBITDA multiple applied to 2027 estimates. Our EV/EBITDA adjusted for EBITDA growth implies a valuation per share of SR 13.1 based on 11.1x 2027E EV/EBITDA.

As a result of the change in valuation approach adjusted to EBITDA vs. EBITDA growth (85% weight), the addition of an M&A component (15% weight) and our estimate changes (discussed earlier), our target price decreases by 50% to SR 13.4 from SR 27.0, implying c.2% downside vs the current share price. We note that the reduction in our target price is driven primarily by lower earnings estimates and a weaker growth outlook for Jahez. A smaller portion of the decline reflects our shift in valuation methodology from sales growth to EBITDA growth, as we believe investors are likely to place greater emphasis on profitability given the current competitive environment.

Exhibit 47: We arrive at a PT of SR13.4 using 11.1x EV/EBITDA adjusted to EBITDA growth (85% weight) and 13.0x M&A premium (15% weight)

Fundamental valuation calculation	EBITDA 2027E	EV/EBITDA multiple (based on EBITDA growth)	EV 2027E	Per share valuation on FY27	M&A valuation calculation	EBITDA 2027E	EV/EBITDA multiple (based on sales growth)	EV 2027E	Per share valuation on FY27

Key risks:

- **Ability to retain and attract new merchants, customers and delivery partners:** Jahez's operations are highly dependent on merchants (which offer their products on its platform and use its delivery services), customers (who use its applications to place orders) and delivery partners (who deliver the product on time). An ability/inability to retain or attract new merchants, customers or delivery partners can lead to a better/weaker-than-expected performance.
- **Change in commission rate paid by merchants:** Jahez's ability to pass through higher commissions to merchants given its lower take-rates vs. competitors is a key upside. On the other hand, if the merchants that use Jahez's platform are not satisfied with the service, sales volume and profitability they generate from the platform, they may negotiate to pay lower commission rates to Jahez which could impact the company's revenue performance.
- **Attracting delivery partners and cost of delivery partners:** With the increase in competition within the industry, the ability/inability to attract delivery partners is a key risk to Jahez's operations. Similarly, an increase/decrease in benefits to delivery partners (due to regulations around competition) would also impact the group's revenue/earnings. In addition, the group is exposed to collection risk where delivery partners collect cash on orders placed against cash on delivery, and if the delivery partner fails to pay it to the company, it could post losses.

- **Change in delivery fees from customers:** The group charges delivery fees to customers for the services it provides. However, if customers are not satisfied with the services, prices, quality of services or promotions offered by the company, they may cease to use the platform thereby impacting delivery fee income. Similarly, the ability of the company to pass-through higher delivery fees would be a positive for earnings.
- **Risk on pricing strategy/increase in competition:** The pricing for products on Jahez's platforms is based on several factors including operational costs, regulatory requirements, marketing strategy and competitor pricing. An increase in competition (from other aggregators or merchants' own applications) could lead to an increase in promotions or lower prices and/or market share losses that could impact the company's profitability.
- **Consolidation in the industry:** Consolidation in the industry that reduces competitive pressure would be positive for the company. We have also incorporated an M&A premium in our valuation framework to arrive at our 12mPT for Jahez but any transaction involving a higher or lower acquisition multiple could drive up/downside risk to our valuation.

Appendix: Peer benchmarking and financial forecasts

Exhibit 48: Talabat's revenue growth is stronger than Jahez's but lower than global peers

Reg AC

We, Harsh Mehta, Vaishnavi Gupta and Swarnilee Patra, hereby certify that all of the views expressed in this report accurately reflect our personal views about the subject company or companies and its or their securities. We also certify that no part of our compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Unless otherwise stated, the individuals listed on the cover page of this report are analysts in Goldman Sachs' Global Investment Research division.

Contributing Authors: Harsh Mehta Goldman Sachs International, Vaishnavi Gupta Goldman Sachs India SPL, Swarnilee Patra Goldman Sachs India SPL.

Unless otherwise stated, the individuals listed in the Contributing Authors disclosure of this report are analysts in Goldman Sachs' Global Investment Research division.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

The rating(s) for Jahez International and Talabat Holding is/are relative to the other companies in its/their coverage universe: AFG International, Abdullah Al Othaim Markets Co., Air Arabia, Alamar Foods, Aldar Properties, Almarai Co., Americana Restaurants, BinDawood Holding, Cenomi Centers, Dallah Healthcare Holding, Dar Al Arkan Real Estate, Dr. Sulaiman Al Habib Med Group, Emaar Development, Emaar Properties, Flynas Co, Herfy, Jahez International, Jarir Marketing Co., Life Healthcare Group, Lulu Retail Holdings, Mouwasat Medical Services, Netcare Ltd., Savola Group, TECOM Group, Talabat Holding, United Electronics Co.(Extra)

Company-specific regulatory disclosures

The following disclosures relate to relationships between The Goldman Sachs Group, Inc. (with its affiliates, "Goldman Sachs") and companies covered by Goldman Sachs Global Investment Research and referred to in this research.

Goldman Sachs beneficially owned 1% or more of common equity (excluding positions managed by affiliates and business units not required to be aggregated under US securities law) as of the second most recent month end: Talabat Holding (AED1.25)

Goldman Sachs expects to receive or intends to seek compensation for investment banking services in the next 3 months: Jahez International (SR13.65) and Talabat Holding (AED1.25)

Goldman Sachs had an investment banking services client relationship during the past 12 months with: Jahez International (SR13.65) and Talabat Holding (AED1.25)

Distribution of ratings/investment banking relationships

Goldman Sachs Investment Research global Equity coverage universe

	Rating Distribution			Investment Banking Relationships		
	Buy	Hold	Sell	Buy	Hold	Sell
Global	50%	34%	16%	65%	60%	45%

As of April 1, 2026, Goldman Sachs Global Investment Research had investment ratings on 3,074 equity securities. Goldman Sachs assigns stocks as Buys and Sells on various regional Investment Lists; stocks not so assigned are deemed Neutral. Such assignments equate to Buy, Hold and Sell for the purposes of the above disclosure required by the FINRA Rules. See 'Ratings, Coverage universe and related definitions' below. The Investment Banking

Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

Price target and rating history chart(s)

The price targets shown should be considered in the context of all prior published Goldman Sachs research, which may or may not have included price targets, as well as developments relating to the company, its industry and financial markets.

The price targets shown should be considered in the context of all prior published Goldman Sachs research, which may or may not have included price targets, as well as developments relating to the company, its industry and financial markets.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at <https://www.gs.com/worldwide/brazil/area/gir/index.html>. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under

applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details, a copy of the annual compliance audit report and other relevant information and disclosures can be found at this link:

<https://www.goldmansachs.com/worldwide/india/research-analyst>. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at <https://www.gs.com/disclosures/europeanpolicy.html> which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

Global product; distributing entities

Goldman Sachs Global Investment Research produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States

of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
