

China Consumer Connection: Online Brand Tracker: May-26: Divergent 618 performance across most sectors; Cosmetics led, IMF/White Goods

We summarize the May updates of our Online Brand Tracker within. **Key highlights:**

1. Category performance: In May-26, we observe weak performance for consumer categories - With Tmall/Taobao/JD combined, Women's clothing was flat yoy while all other categories recorded a yoy decline. **Sports shoes/Beauty/Supplements/Dairy/Sportswear/Small kitchen appliances/IMF/Beer/Pet Foods/White goods** registered -2%/-4%/-6%/-9%/-11%/-18%/-19%/-22%/-22%/-31% yoy declines. Note: Tracker data suggest a meaningful re-base in Beauty and Supplements for Tmall/Taobao numbers in 2025 Jan - May.

Considering Douyin/Tmall/Taobao/JD combined, we saw **Beauty** GMV growing at 14% yoy in May, accelerating vs. 11% in April, partially helped by a softer Women's Day in 1Q, along with increasing subsidies from platforms and local governments. At the same time, aggregate GMV for core brands (**Exhibit 10**) for **Sportswear/Condiments** grew at 14%/47% yoy in May, accelerating vs. April at 9%/34%. Other categories recorded deceleration/decline, with **Dairy/Women's Clothing/Pet Foods/Beer/IMF/White Goods** at 3%/-1%/-8%/-8%/-24%/-33% yoy for core brands in May (Pet Food using industry yoy) vs. 11%/1%/18%/1%/-23%/-35% in April.

2. Domestic vs. MNC brands:

In **Cosmetics**, data show a rebound in local brands while MNCs continuing to outperform. **We think the acceleration was partially helped by a softer Women's Day in 1Q, along with increasing subsidies from platforms and local governments. Local brands that rebounded were Forest Cabin/Botanee/Shanghai Jahwa/MGP/Proya/Shanghai Chicmax/Giant Biogene**, recording 110%/43%/27%/22%/8%/7%/6% yoy GMV growth, while **Bloomage/Yatsen** saw GMV decline by 19%/36% yoy. For MNCs, **Estee Lauder (EL)/L'Oreal/Shiseido** delivered 36%/16%/11% yoy GMV growth, while **LG H&H/Amore Corp/Kose** were under pressure at -34%/-31%/-22% yoy. **Estee Lauder group outperformed in the higher segment, while L'Oreal group was driven by dermocosmetics, albeit mass-market brands faced local brands' competition.**

Besides accelerating in May and solid growth for key covered brands/western brands in phase I (see our **618 phase I pulse check**: Beauty GMV is tracking well with likely improving ROI), for Jun 1-8 on Douyin, we note an ongoing robust profile for

western MNCs with **L'Oreal and EL Group** at 50%+ yoy while local brands are mixed: **Mao Geping** is catching up at 60%+ yoy Jun-to-date, uplifting its 618-to date yoy to 40%+ yoy. **Giant is accelerating on an easier base at 13% yoy Jun-to-date. To reflect the full picture**, for the first 25 days of 618 (May 15 - June 8) on Douyin, **Forest Cabin** led with triple-digit% LFL growth, partly due to an easier base, followed by **Proya/Botanee/MGP/Giant** at 64%/51%/43%/20% LFL growth.

In **Sportswear**, looking at May data across Tmall, JD, and Douyin, we see an overall divergent brand performance in May, with Labor Day demand soft but 618 shopping festival promotion brought support for certain brands. We flag that due to cadence of the 618, promotion may diverge across brands; we suggest combining May - Jun sales to assess overall performance. In May, several outdoor names such as Arc'teryx and Descente, as well as niche premium brand Lulu saw deceleration in May partially on a high base, while adidas, Li Ning, Anta, Fila, Bosideng, Salomon accelerated from Apr possibly on 618 shopping festival promotion. We also flag that brands have been executing omni-channel strategies in both online (e.g.; emerging channels like Dewu) and offline, suggesting the sales data collected by data vendors may not reconcile with actual growth.

Outperforming brands (May): Estee Lauder, Winona, Forest Cabin, Fanci, Nongfu, Haidilao

Underperforming brands (May): Nutrilon, Timage, QuadHA, Mead Johnson, Wyeth, Midea

Brand performance (Tmall, Taobao, JD)

Baby, Health and Beauty products

Leading brands growth moderated in May probably due to a tough comp in May'25. On Tmall/Taobao/JD combined, infant milk formula sales declined by 19% yoy in May (vs. -14% yoy in Apr), with -2% yoy growth on Tmall/Taobao and -26% on JD on a tough base. Feihe declined by -30% yoy in May, vs. -47% yoy in Apr. Yili declined at -23% yoy in May vs. -21% yoy in Apr, and Yili + Pro-kido combined declined -17% in May vs. -10% in Apr. Among MNCs, Aptamil/A2/Biostime grew +6%/-25%/25% yoy in Apr, vs. +2%/+27%/+68% yoy in Apr, and Mead Johnson/Wyeth/Nutrilon declined significantly at -45%/-45%/-71% vs. -31%/-32%/-45% in Apr. Bellamy's growth momentum moderated at 19% in May vs. +80% in Apr.

Cosmetics

GMV performance on Tmall/Taobao/Douyin/JD: In May, total cosmetics GMV online grew 14% yoy, accelerating from 9% in 1Q26. By platform, Douyin grew 30% in May (vs. 16% in 1Q26), while Tmall/Taobao grew by 1% (vs. flat in 1Q26), and JD declined by 17% (vs. 8% decline in 1Q26). **We think the acceleration was partially helped by a softer Women's Day in 1Q, along with increasing subsidies from platforms and local governments.** We saw regional governments expanding subsidies for beauty during the 618 shopping festival with greater discounts, region and brand coverage vs. Double 11, discounts ranging at up to 20% and covering a wide range of cosmetics brands and categories which we believe further helped drive sales.

May performance by brand:

Local brands: Forest Cabin led with 110% yoy growth in May, followed by **Botanee** at 43% yoy. **Shanghai Jahwa** recorded 27% yoy growth, with Dr. Yu/Herborist/Liushen growing 13%/46%/32%. **MGP** grew 22% yoy. **Proya** also grew 8% yoy with 15% growth from its core brand Proya. **Giant Biogene** was up 6% yoy, due to 22% yoy growth in Collgene, supported by Comfy at 4% growth. **Shanghai Chicmax** grew 7% yoy, supported by New Page/Armiyo at 134%/100% yoy, while KANS declined 7% yoy. Other brands recorded declines. **Bloomage** underperformed with 22% yoy decline, dragged by QuadHA/Biomeso at 44%/34% decline yoy, while Biohyalux/Medrepair grew 2%/8% yoy. **Yatsen** lagged at 36% yoy decline, with Perfect Diary down 36% yoy.

MNC brands: Estee Lauder Group led GMV growth at 36% yoy driven by Estee Lauder/La Mer/M.A.C. at 39%/42%/53% yoy, while Clinique declined by 21% yoy, Bobbi Brown was down 1% yoy, and Origins/Jo Malone London grew 9%/14% yoy. **L'Oreal Group** recorded 16% yoy GMV growth, with HR/Skinceuticals/La Roche Posay/YSL at 29%/54%/66%/27% yoy, while Lancome grew 18% yoy and L'Oreal core brand/Maybelline were down 15%/11% yoy. **Shiseido** grew 11% yoy, with Nars/ANESSA/The Ginza/Elixir/IPSA at 32%/54%/42%/29%/9% yoy, while Shiseido/CPB were up 4%/-1% yoy. **Kose** recorded a 22% yoy decline in May. **LG H&H** recorded a 34% yoy decline driven by weak performance of Whoo at 34% decline yoy. **Amore** lagged at 31% decline, with Sulwhasoo/Laneige/Innisfree down 32%/26%/44% yoy.

Sporting Goods

Looking at May data across Tmall, JD, and Douyin, we see an overall divergent brand performance in May, with Labor Day demand soft but 618 shopping festival promotions brought support for certain brands. We flag that due to cadence of the 618, promotions may diverge across brands; we suggest combining May – Jun sales to assess overall performance. Several outdoor names such as Arc'teryx and Descente, as well as niche premium brand Lulu saw deceleration in May partially on a high base, while adidas, Li Ning, Anta, Fila, Bosideng, Salomon accelerated from Apr possibly on 618 shopping festival promotion. We also flag that brands have been executing omni-channel strategies in both online (e.g.; emerging channels like Dewu) and offline, suggesting the sales data collected by data vendors may not reconcile with actual growth.

Appendix: Tracker details and data source

Online sales data is from Moojing, a source that tracks data through web crawler technology on the Alibaba/JD platforms. It includes the Tmall, Taobao and JD platforms through its industry data function, and provides store sales data for selective brands that we closely monitor through its store monitor function. This data set includes a wide range of consumer product categories such as baby products, supplements, cosmetics, sportswear/shoes, luxury items, home appliances, alcohol, and F&B.

The brand/store/industry monitor captures all the relevant SKUs sold on the Alibaba/JD platforms, and the sales value data is calculated with sales volume and price shown on the platforms. However, there could be differences between actual numbers and estimations from Moojing.

We also note that online penetration has been increasing over the past several years, and could account for up to 30%–35% of overall sales (diapers, infant formula, etc.) and an average of 10%–15% for most categories based on Euromonitor data. Hence, we believe online sales trends will be an increasingly important indicator for overall sales trends in the Consumer industry. In addition, the online market share gain/loss for each brand is also a reflection of the company's specific strategy and key SKU performance. In our brand tracker, we highlight overall category growth as well as the performance of top players/brands and market share trends.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Goldman Sachs Investment Research global Equity coverage universe

	Rating Distribution			Investment Banking Relationships		
	Buy	Hold	Sell	Buy	Hold	Sell
Global	50%	34%	16%	65%	60%	45%

As of April 1, 2026, Goldman Sachs Global Investment Research had investment ratings on 3,074 equity securities. Goldman Sachs assigns stocks as Buys and Sells on various regional Investment Lists; stocks not so assigned are deemed Neutral. Such assignments equate to Buy, Hold and Sell for the purposes of the above disclosure required by the FINRA Rules. See 'Ratings, Coverage universe and related definitions' below. The Investment Banking Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Distribution of ratings: See the distribution of ratings disclosure above. **Price chart:** See the price chart, with changes of ratings and price targets in prior periods, above, or, if electronic format or if with respect to multiple companies which are the subject of this report, on the Goldman Sachs website at <https://www.gs.com/research/hedge.html>.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock’s total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region’s Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts’ investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data

feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
