Near-term headwinds, but capacity leadership remains the key differentiator; reiterate OW

Recent investor focus has centered on VGT's initial share allocation in Vera Rubin and the timeline of the Kyber project – although we believe investors have placed too much emphasis on such uncertainties while overlooking the key determinant of market share in the next two to three years. In our view, high-quality manufacturing capacity, not initial share allocation, will ultimately determine suppliers' wallet share for AI PCB projects. While Kyber remains under testing, with higher PCB complexity posing challenges, we believe stronger demand for NVDA's current generations and expanding share in Google's projects should partly offset the impact to VGT if Kyber is delayed. We lower our Jun-27 PT to HK\$500 to reflect these headwinds but believe the recent correction has more than priced in such risks, leaving an attractive risk-reward profile.

- Initial Rubin allocation does not determine long-term market share.** Our supply chain checks suggest that Vera Rubin PCB mass production is progressing slightly behind our previous expectation, while the overall rack rollout remains largely intact. Although VGT's initial share allocation appears lower than in the previous generation, we do not view this as a structural share loss. As production scales, supplier allocation should increasingly depend on capacity support. Given its continued capacity expansion, we expect VGT to regain share during larger-volume production in the coming quarters.
- Kyber is still progressing toward production readiness.** Our research shows that Kyber rack (NLV144) is currently under testing in multiple technology paths, as complex PCB architecture and higher performance targets have raised the bar across material selection, manufacturing processes and system-level assembly. Should Kyber commercialization take longer than expected, we think the earnings impact on VGT should be partly offset by stronger demand for NVDA's current generation and incremental revenue from Google's projects alongside share expansion.
- Near-term headwinds are more than priced in.** We cut our 2026-28E earnings forecasts by 5-13% to reflect a slightly later-than-expected ramp of PCB projects scheduled for this year, as well as the potential impact of a later Kyber rollout. Accordingly, we lower our Jun-27 PT to HK\$500, based on 22x 12m rolling forward P/E (prior: 24x, with consideration of ramp-up uncertainties). Following the recent share price correction (-51% from the peak on May 28, vs -5% for HSTECH), we believe the market has overreacted to these short-term headwinds. We view the pullback as an opportunity to accumulate and expect accelerating earnings growth in 2H26 to serve as a catalyst. Reiterate OW.

Summary Investment Thesis and Valuation

Investment Thesis

VGT-H is a global leading high-end PCB manufacturer with the No.1 market share in the AI and high-performance computing segments. We believe strong AI demand and continuous PCB content value growth, along with spec upgrades, will enable high-performance computing to keep driving global PCB market expansion. We consider VGT a key beneficiary amid the strong AI PCB cycle. Despite recent headwinds from new projects ramping up and Kyber uncertainties, we believe VGT's industry-leading technologies and accelerating capacity expansion should help to defend its wallet share and drive persistent earnings growth. We forecast an earnings CAGR of 73% over 2025-28 and expect accelerating earnings growth in 2H26 to serve as a share price catalyst. Maintain OW.

Valuation

Our Jun-27 PT of HK\$500 is based on 22x 12-month rolling forward PE; this is ~15% below its A-share peers' 2027 average (largely on par with the average H/A discount YTD suggested by HSAHP Index) and in line with its global peers' average.

Victory Giant Technology - H (2476.HK, 2476 HK) Price Chart

Date	Rating	Price (HK\$)	Price Target (HK\$)
08-Jun-26	OW	368.60	600

Source: Bloomberg Finance L.P. and J.P. Morgan; price data adjusted for stock splits and dividends.
Initiated coverage Jun 08, 2026. All share prices are as of market close on the previous business day.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.

J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.

Coverage Universe: Liu, Cherry : Cowell e Holdings - H (1415.HK), Faratronic - A (600563.SS), Horizon Robotics - H (9660.HK), Huaqin Co Ltd - A (603296.SS), Jianghai Capacitor - A (002484.SZ), RoboSense Technology (2498.HK), Transsion Holdings - A (688036.SS), Victory Giant Technology - H (2476.HK)

J.P. Morgan Equity Research Ratings Distribution, as of July 04, 2026

	Overweight (buy)	Neutral (hold)	Underweight (sell)
