Weichai Power - A/H

Fireside chat and management update support the AIDC thesis; price reset creates an attractive entry point; 1H26 preview

Recent investor engagement around Weichai Power remains high despite recent price swings, as reflected in strong participation at the fireside chat with Phil Buller (JPM European Capital Goods Analyst, covering Siemens). The session, which drew over 130 sign-ups, focused on the global AIDC cycle, architecture shifts, and sector risk/reward—key themes directly relevant to Weichai's positioning and outlook. In addition, we highlight our update call with Weichai's management that provided incremental color on AIDC execution, orderbook trends, and margin outlook. Weichai's US market entry is progressing on track, as the 2.5MW gas engine product for AIDC was officially launched at the end of June, with customer validation and US EPA certification now underway and expected to take 2-3 months, i.e., by August. Initial shipments will follow certification, and Weichai is already engaging directly with major US data center customers. Weichai's flexible go-to-market approach – including both direct sales and partnerships – positions the company to capture incremental demand as US supply constraints persist. Last but not least, concerns about weak 1H26 and 2Q26 delivery have weighed on the share price in light of the soft domestic ICE truck sales in May/June. Against this backdrop, Weichai's parent company's 1H26 beat provides positive read-throughs as we note Weichai Group's revenue rose 22% Y/Y to over Rmb200B and data center product revenue was up 140% Y/Y.

Stock view: Since the early May peak, Weichai has corrected by c. 20-25%, underperforming MSCI China (-7%) over the same period. This pullback has been driven in part by investor concerns around 1H26 delivery and the risk of a miss versus expectations, as well as broader debate on cycle sustainability and overcapacity. Despite the recent pullback, Weichai has still recorded c. 50% gains on average YTD (A/H), outperforming MSCI China (-12%) and ranking as a top performer in the China industrials universe. At current levels, our price target of Rmb49 for the A shares and HK\$52 for the H shares implies 80% and 75% upside, respectively. The stock trades at c. 12x FY27E P/E with a current yield of c. 4%. We view the current reset as an opportunity, with upside to our price target supported by a more resilient delivery profile, margin discipline, and a multi-year growth runway.

Fireside chat with Phil Buller underscores that AIDC BTM overcapacity fears may be overblown

Recent discussion with Phil Buller (JPM European Capital Goods Analyst, covering Siemens) provided timely perspective on the global AIDC cycle

Investors should consider this report as only a single factor in making their investment decision.

and the current investor debate around overcapacity in behind-the-meter (BTM) power solutions. Phil argued that the market's concerns about imminent oversupply are not supported by the underlying demand and supply data. He pointed to persistent supply bottlenecks, robust order growth, and the structural nature of the data center power upcycle as evidence that the risk of true overcapacity remains a post-2030 issue. Phil's analysis suggests that the current correction is more sentiment-driven than a reflection of deteriorating fundamentals, and that leading suppliers – including Weichai – are well positioned to defend margins and sustain growth as the cycle matures.

- **The architecture shift in data centers is driving a structural demand upcycle.** Phil's analysis points to a step-change in data center design, with rack power density expected to rise from ~10kW historically to 50kW today and potentially 600kW+ by decade-end. This transformation is creating hardware bottlenecks and sharply higher power requirements, forcing hyperscalers to rethink capex and power planning. The long-term US target of 320GW (nearly one-third of current US electricity consumption) underpins a multi-year demand cycle for power equipment, with implications for both global and China-based suppliers. Phil highlighted that order growth remains robust, with European equipment firms reporting strong data center-related order momentum and fundamentals outpacing market pricing.
- **Order backlogs and pricing power are holding up, with overcapacity risk a post-2030 issue.** US data center power demand is poised to grow at a c.22% CAGR, with supply still lagging orders—last year saw c55GW delivered vs. c100GW new orders, and this year 110–120GW new orders vs. 64–65GW deliveries. Phil's view is that backlogs will likely keep expanding, supporting pricing power for leading suppliers. The overcapacity debate is nuanced: while market volatility reflects concerns about supply catching up, the risk of true overcapacity is more of a post-2030 issue, especially for high-value large-frame turbines and engines.
- **Phil Buller sees the market underestimating the durability of the AIDC cycle and margin resilience.** Phil argued that the combination of architecture-driven demand, grid bottlenecks, and hyperscaler capex cycles will support continued growth and pricing power for leading suppliers. He emphasized that the current correction is more about sentiment reset than a fundamental inflection, and that the cycle's durability and margin profile remain underappreciated by the market.

Weichai's latest update demonstrates that strategic progress and execution remain on track

The most recent management call suggests continued progress on AIDC execution, with shipment guidance reaffirmed and the US gas engine certification process advancing as planned. The update also highlighted Weichai's flexible go-to-market strategy in the US, ongoing capacity expansion, and a robust order pipeline with top-tier data center customers.

- **AIDC execution and product roadmap are supporting robust growth and order visibility.** Weichai is tracking in line with its 2026 AIDC shipment guidance of 3,500–4,000 units, with 1H26 deliveries and a back-half weighted ramp supported by a strong order pipeline. Diesel backup engines remain the near-term volume anchor, while gas engines are driving higher profitability (GPM 40–50%) and have already secured significant 2027 orders with leading cloud customers. The 2.5MW gas engine is now positioned as the mainstream data center solution, with US certification underway, and the 5.5MW model is set to scale from 2027.
- **Capacity expansion and flexible manufacturing are positioning Weichai to capture incremental demand.** The company is on track to reach 8,000-10,000 units of AIDC-related capacity by end-2027, with flexible lines supporting both diesel and gas products. SOFC capacity is also ramping, with 30MW in 2026 and 200MW in 2027, and management is prepared to accelerate investment if market demand warrants. This manufacturing agility underpins Weichai's ability to respond quickly to shifts in customer requirements and market opportunities.
- **Technology leadership, supply chain control, and new energy initiatives are strengthening Weichai's competitive edge.** Weichai's integrated approach – leveraging mature platforms, rapid capacity buildout, and a predominantly domestic supply chain – continues to deliver cost and service advantages over global peers. The company's direct engagement in North America and exclusive diesel partnership with Generac support both margin capture and aftermarket monetization, with recurring service revenue poised to become a larger share of the profit pool. SOFC and new energy initiatives are expanding the long-term growth runway, while the legacy engine business remains a stable profit base as the profit mix shifts toward AIDC and new energy solutions.
- **Margin trends remain robust, with mix shift and scale supporting profitability.** Diesel backup engine GPM is holding at c. 35-40%, while gas engines are delivering 40-50% GPMs, driving blended margin improvement. SOFC is not poised as a material profit contributor in coming years, but management sees breakeven at 100MW and GPM potential of 30–40%+ at scale. Aftermarket revenue is poised to rise as the installed base grows, with management targeting 20%-30% of lifecycle value from services and parts.

1H26 preview; positive read-throughs from the parent-co earnings beat

Recent investor concerns have centered on a weaker 2Q26 print, driven by the sluggish domestic ICE HDT sales in May-June – particularly soft LNG truck volumes – which has weighed on Weichai's share price in recent months. However, we believe these concerns are overdone, as we believe Weichai's AIDC business fundamentals remain robust and continue to

anchor the company's growth and margin profile into 2H26. Furthermore, we see positive read-throughs from the better-than-expected parent-co's 1H26 print, released on July 18 ([link](#)).

- **1H26 earnings preview.** We expect Weichai's 2Q and 1H26 profit to rise by 12%-15% Y/Y. This is underpinned by broad-based sector momentum, with excavator sales up 26% Y/Y, loader sales up 27% Y/Y, and HDT volumes up 21% Y/Y in 1H26. Market expectations are muted and we see scope for an earnings beat, mainly on the margin front.
- **Parent company's 1H26 beat provide positive read-throughs.** Weichai Group reported headline revenue surpassing Rmb200B for the first time in 1H26, up 22% Y/Y (an acceleration from the 14% Y/Y rise in 2025), with all major operating metrics at record highs. Power and energy revenue rose 30% Y/Y, and data center product revenue grew by 140% Y/Y, highlighting the acceleration in strategic growth areas. Engine market share increased across core segments, export mix improved, and the new energy business is gaining traction, supporting the group's resilience and long-term growth curve. Management reaffirmed the full-year Rmb400B revenue target (JPM notes this refers to the group level) and outlined priorities for accelerating new energy launches, and expanding high-end power markets. While the exact breakdown is not disclosed, Weichai Power's revenue typically forms around 65% of the group total, and the listed company's earnings trajectory remains the key read-through for overall group performance.

Weichai Power - A (Overweight; Price Target: Rmb49.00)

Investment Thesis

Weichai is a leading HDT engine provider, with a ~40% domestic market share. Investors have started to recognize the company's transition from a cyclical, legacy engine story to a multi-year growth platform anchored by AIDC and new energy solutions. The re-rating is still at an early stage, with the market's attention so far focused on the strong momentum in AIDC backup engines, but not yet fully reflecting the scale of the aftermarket opportunity, which could potentially grow to 5x the size of new product sales over the coming years and is not yet modeled in consensus. More importantly, Weichai is moving into the AIDC primary power segment for overseas markets, leveraging its SOFC and gas engine technology to address the next phase of global data center investment. We maintain our bullish view on Weichai.

Valuation

Our Jun-27 PT of Rmb49 is based on our DCF valuation. Key assumptions include:

- A WACC of 8.1%, driven by a cost of equity of 8.6% and a beta of 0.9x (latest Bloomberg data).
- Cost of debt at 5% and a tax rate of 25%.
- Target debt-to-capital of 10% and terminal growth of 3%.
- A 5% A/H discount to value the A-shares.

Risks to Rating and Price Target

Key downside risks include: (1) a slower-than-expected recovery in heavy-duty truck sales; (2) weaker-than-expected market-share gains; and (3) weaker-than-expected performance at Kion.

Weichai Power - H (Overweight; Price Target: HK\$52.00)

Investment Thesis

Weichai is a leading HDT engine provider, with a ~40% domestic market share. Investors have started to recognize the company's transition from a cyclical, legacy engine story to a multi-year growth platform anchored by AIDC and new

energy solutions. The re-rating is still at an early stage, with the market's attention so far focused on the strong momentum in AIDC backup engines, but not yet fully reflecting the scale of the aftermarket opportunity, which could potentially grow to 5x the size of new product sales over the coming years and is not yet modeled in consensus. More importantly, Weichai is moving into the AIDC primary power segment for overseas markets, leveraging its SOFC and gas engine technology to address the next phase of global data center investment. We maintain our bullish view on Weichai.

Valuation

Our Jun-27 PT of HK\$52 is based on our DCF valuation. Key assumptions include:

- A WACC of 8.1%, driven by a cost of equity of 8.6% and a beta of 0.9x (latest Bloomberg data).
- Cost of debt at 5% and a tax rate of 25%.
- Target debt-to-capital of 10% and terminal growth of 3%.

Risks to Rating and Price Target

Key downside risks include: (1) a slower-than-expected recovery in heavy-duty truck sales; (2) weaker-than-expected market-share gains; and (3) weaker-than-expected performance at Kion.

Analyst Certification: The Research Analyst(s) denoted by an “AC” on the cover of this report certifies (or, where multiple Research Analysts are primarily responsible for this report, the Research Analyst denoted by an “AC” on the cover or within the document individually certifies, with respect to each security or issuer that the Research Analyst covers in this research) that: (1) all of the views expressed in this report accurately reflect the Research Analyst’s personal views about any and all of the subject securities or issuers; and (2) no part of any of the Research Analyst’s compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the Research Analyst(s) in this report. For all Korea-based Research Analysts listed on the front cover, if applicable, they also certify, as per KOFIA requirements, that the Research Analyst’s analysis was made in good faith and that the views reflect the Research Analyst’s own opinion, without undue influence or intervention.

All authors named within this report are Research Analysts who produce independent research unless otherwise specified. In Europe, Sector Specialists (Sales and Trading) may be shown on this report as contacts but are not authors of the report or part of the Research Department.

- **Debt Position:** J.P. Morgan may hold a position in the debt securities of Weichai Power - A, Weichai Power - H or related entities, if any.

Company-Specific Disclosures: J.P. Morgan does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan-covered companies, and certain non-covered companies, by visiting <https://www.jpmm.com/research/disclosures>, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

Weichai Power - A (000338.SZ, 000338 CH) Price Chart

Source: Bloomberg Finance L.P. and J.P. Morgan; price data adjusted for stock splits and dividends.
Initiated coverage Dec 03, 2014. All share prices are as of market close on the previous business day.

Weichai Power - H (2338.HK, 2338 HK) Price Chart

Source: Bloomberg Finance L.P. and J.P. Morgan; price data adjusted for stock splits and dividends.
Initiated coverage Aug 29, 2007. All share prices are as of market close on the previous business day.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.

J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to

those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.

Coverage Universe: Li, Karen : COSCO SHIPPING Holdings Co Ltd - A (601919.SS), COSCO SHIPPING Holdings Co Ltd - H (1919.HK), CRRC Corp - A (601766.SS), CRRC Corp - H (1766.HK), Cathay Pacific Airways (0293.HK), China Merchants Port Holdings (0144.HK), Estun Automation - A (002747.SZ), Evergreen Marine (2603.TW), Full Truck Alliance (YMM), Hongfa Technology - A (600885.SS), International Container Terminal Services Inc (ICT.PS), J&T Express - H (1519.HK), JD Logistics (2618.HK), Jiangsu Hengli Hydraulic - A (601100.SS), Leader Harmonious Drive System Co. J.P. Morgan Equity Research Ratings Distribution, as of July 04, 2026

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	53%	36%	12%
IB clients**	83%	80%	73%
JPMS Equity Research Coverage*	51%	37%	12%
IB clients**	95%	92%	87%

*Please note that the percentages may not add to 100% because of rounding.

**Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.

For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at <http://www.jpmorganmarkets.com>, contact the primary analyst or your J.P. Morgan representative, or email research.disclosure.inquiries@jpmorgan.com. For material information about the proprietary models used, please see the Summary of Financials in company-specific research reports and the Company Tearsheets, which are available to download on the company pages of our client website, <http://www.jpmorganmarkets.com>. This report also sets out within it the material underlying assumptions used.

History of Investment Recommendations:

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of <http://www.jpmorganmarkets.com> where you can also search by analyst name, sector or financial instrument.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Registration of non-US Analysts: Unless otherwise noted, the non-US analysts listed on the front of this report are employees of non-US affiliates of J.P. Morgan Securities LLC, may not be registered as research analysts under FINRA rules, may not be associated persons of J.P. Morgan Securities LLC, and may not be subject to FINRA Rule 2241 or 2242 restrictions on communications with covered companies, public appearances, and trading securities held by a research analyst account.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to [UK MIFID Research Unbundling exemption](#) for details of J.P. Morgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.

Confidentiality and Security Notice: This transmission may contain information that is privileged, confidential, legally privileged, and/or exempt from disclosure under applicable law.
