

CHINA OVERSEAS LAND & INVESTMENT (0688.HK)

1H26 Preview: Sector-leading contracts sales growth though margin pressure still lingers; Buy

We update our estimates by 1) on positive side – reflecting stronger-than-expected sales performance in 1H26 (+12% yoy), we raise our 2026E contract sales estimate by 11% to Rmb265bn, implying flattish/+6% yoy in 2H and full-year 26E, ahead of coverage stronger SOE average of -7%/-4%. As a result, we revise up our DP revenue forecast by an average 2% for 2026E-28E, with total revenue expected to see only a modest decline; 2) on negative side – we lower 2026E-28E DP gross margin by average 1pp and now expecting 14pp GPM for 2026E, which is closer to the mid-point of management's beginning-of-year estimates (i.e 13%-15%) amid ongoing pricing pressure outside of top-tier cities. That said, we believe COLI remains one of the best-positioned developers in our coverage, supported by a high-quality landbank (over 80% Tier-1/2 exposure and lowest aged inventory among coverage), limiting near-term impairment risk. As a result, we lower our core earnings estimate by average 5%, with 2026E core EPS expected to decline 6%, followed by recovery from 2027E as margins stabilize. Our revised topline and core earnings forecasts are 5% and 4% below Datastream consensus, respectively, and our 12-month NAV-based target price remains unchanged at HK\$14.7 (still at a 10% NAV discount). Maintain Buy.

- **1H contract sales solid while landbanking sequentially slowed down:** COLI's 1H26 contract sales recorded at a solid +12% yoy to Rmb134bn, ahead of our stronger SOE coverage average of flattish, riding on strong sales performance by high-end/luxury projects with prime locations in T1 cities. On the other hand, we note COLI's 1H26 land investment only accounted for HSD% of contract sales, below c.50% in FY25, 40% GSe for full-year 26E and mid-twenties% of our tracked SOE developers' average during 1H26. That said, we estimate project-level GPMs for new land acquisition in 1H26 remain competitive at c.29% (5pp above tracked developers' average). **Our view on 1H26:** we expect roughly a low-teen% yoy core income decline in 1H26, reflecting a moderate yoy dip in the topline, aligning with the broader industry trend and our full-year 26E projection and approx. 1pp yoy DP GPM decline given continued property price weakness outside top-tier cities.
- **Keys to watch next: 1)** For upcoming 1H26 earnings - management guidance on potential inventory impairment and profitability impacts, especially considering

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

COLI's cumulative write-down against total inventory balance ratio ranks bottom among our coverage SOE developers; **2)** whether solid contract sales momentum could carry forward in 2H26E (e.g. whether there will be news reports of robust sell-through of its high-profile luxury housing projects such as Yujinlu project in Shanghai); **3)** whether land acquisition pace would re-accelerate in 2H26E, given a comparatively muted 1H); **4)** progress of new/follow-up C-REITs offerings, or other asset disposal initiatives such as office en-bloc sales, and potential disposal gains; **5)** Other policy catalysts which could boost the employment outlook, consumer confidence or support the property market from the supply-side.

Valuation: COLI trades at a 17% discount to end-26E NAV, 0.4X 2026E P/B and 4% 2026E-28E average dividend yield vs. SOE coverage average 34%/0.5X/2%. Maintain Buy. **Key risks:** Sales and margin miss; lower-than-expected land banking scale that could hamper its longer-term growth outlook.

Investment Thesis

We are positive on China Overseas Land & Investment given its shares have priced in the highest impairment loss among SOE (state-owned enterprise) peers, which we consider is unjustified given COLI's peer-leading asset quality and liquidity position. With liquidity pressure continuing to weigh on the industry (particularly on privately owned enterprises), we believe COLI is best positioned to take share from POEs. We expect COLI's share price to continue to outperform on the back of its strong balance sheet to capture low-cost investment for future growth amid an unsettled industry environment. We also expect COLI to achieve more resilient sales and margin performance supported by quality landbank exposure and a healthy liquidity condition. We also see the most attractive total returns, in terms of dividend yield, among our coverage SOE coverage. We are Buy rated on COLI.

Price Target Risks & Methodology

Our end-26E NAV-based target price is at HK\$14.7 based on 10% discount to end-2026E NAV/share.

Key risks: Sales and margin miss; below expectation land banking scale that could hamper its longer-term growth outlook.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock’s total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region’s Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts’ investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs’ involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.
