

Japan Banks: Implications of BOJ MPM and bank deposit rate hike; continued upside for bank shares

BOJ hiked the policy rate from 0.75% to 1.0% at the June 15-16th MPM. In the policy statement and vice governor's press conference, BOJ communicated its view that the current financial conditions remain accommodative, and that it expects to continue to hike the policy rate while monitoring growth and inflation conditions.

Post-MPM, MUFG raised its ordinary deposit rate by +10bp from 0.30% to 0.40%, and hiked its short-term prime rate by +25bp from 2.125% to 2.375%, keeping ordinary deposit beta to policy rate at 40% as widely expected. SMFG and Mizuho followed with ordinary rate hikes to 0.40%. Aozora Bank hiked deposit rate by +25bp for deposits below Y1 million, same as after the previous rate hike, and SBI Shinsei Bank kept its deposit beta contained while announcing a campaign rate for Hyper Deposits. Yokohama Financial Group released new material on the BOJ rate hike impact on its FY3/28 net revenue (excluding securities investment related), showing a rate hike impact of FY3/28 Y14bn pre-tax / approximately Y10bn post-tax / ROE +0.7% rise, in addition to the previous disclosure of FY3/27 post-tax Y3bn impact.

We believe the implications to bank shares are as follows.

1) First, given the policy rate has been hiked to 1.0%, there is now a possibility that many banks with 0.75% policy rate assumptions for FY3/27 guidance may revise up. Also, banks may make progress on disclosing the positive profit impact of this BOJ rate hike to FY3/28 profits, as Yokohama FG has done.

2) With the continuation of policy rate hike cycle confirmed, market may now see higher likelihood that banks may meet or beat FY3/29 midterm plans where policy rate assumptions are 0.75-1.0%. The fact that deposit betas have been in line with expectations in deposit rate hikes disclosed so far also helps to raise likelihood of banks meeting plans.

3) Into this BOJ MPM, we think market positioning in bank stocks was relatively light given also the backdrop of Middle East uncertainty. We think this may be a similar pattern as the December 2025 rate hike, which was preceded by a period of tariff uncertainty. Going forward, we think bank shares may see re-rating or short-covering on awareness of underpricing of policy rate hikes by bank stocks, similar to what was seen after December 2025 policy rate hike. We believe that banks' stocks P/B currently price in policy rate of about 0.75-1.0% based on banks' midterm plan ROE targets and cost of capital ([link](#)). Given the BOJ MPM signaled continuation of rate hike cycle, we think there is room to price in further rate normalization.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock’s total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region’s Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts’ investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.
