Global Markets Research

29 May 2026

Economics - North America

Hints of hikes

- We expect *headline payrolls remained strong at 110k in May*. The unemployment rate likely remained stable at 4.3%, while average hourly earnings rebounded.
- Core PCE inflation moderated in April, but backward revisions to prior months led y-o-y core PCE inflation to accelerate to 3.289% in April from 3.236% in March. Core PCE remained well above the Fed's target of 2% and upside inflation risks persist.
- Trimmed-mean PCE inflation, Chair Warsh's preferred measure, eased to 2.3% y-o-y in April. *We remain skeptical about the usefulness of the measure* as it tends to be slow in detecting a change in the inflation trend and has understated inflation lately.
- FedSpeak this week leaned hawkish as officials discussed inflation scenarios that would warrant hikes. While their base case continues to be a moderation in inflation, various policymakers said they would support hikes if inflation does not come down in a "timely" manner.

We expect employment growth remained elevated in May

Headline *nonfarm payrolls likely rose 110k* in May – a slight deceleration from the prior two months but still above the year-to-date average. Our forecast would bring the 3m average of NFP growth up to 137k – the strongest since December 2024. We expect private payroll gains remained essentially unchanged at 115k in May from 123k in April.

Despite lead indicators (e.g., ADP's weekly private employment measure and continuing jobless claims), pointing to signs of accelerating job gains (*Fig. 1 & 2*), we expect a roughly sideways NFP reading this month due to risks of mean-reversion in certain sectors that outperformed in March and April. For instance, retail trade and couriers and messengers have been exceptionally strong, and are likely to edge lower in April, offsetting strength in construction and manufacturing payrolls.

Production Complete: 2026-05-29 19:14 UTC

We expect the unemployment rate remained unchanged at 4.3%. Labor demand has stabilized in recent quarters (*Fig. 3*), leading to a faster pace of hiring and shorter unemployment duration. Measures of job losses have been mixed (*Fig. 4*). The 4-week moving average for initial jobless claims reached a multi-year low in the May NFP reference week, while the April household survey and March JOLTS point to a modest increase in job losses.

Fig. 3: Labor demand has stabilized in recent quarters

Job loss rates

Source: BLS, Haver, Nomura

Average hourly earnings (AHE) growth likely rebounded to 0.4% m-o-m. A negative calendar effect weighed on AHE in April, but it turns positive in May (AHE tends to underperform when the 12th of the month is on a weekend, and outperforms when the 12th falls mid-week). In our view, the recent slowdown in AHE has largely been driven by technical factors. Underlying wage growth appears elevated, supporting our expectation for positive payback this month.

Core PCE inflation in April softer, but details point to continued price pressures

Core PCE came in softer than expected at 0.24% m-o-m in April, below both our and consensus forecasts of 0.30%. The miss was partly driven by tax-preparation services (*Fig. 5*) and some non-CPI/PPI components. However, prior-month revisions were slightly firmer, leaving core PCE inflation at 3.29% y-o-y in April, up modestly from 3.24% in March.

Despite the downside surprise, financial service prices which declined in April are likely to rebound in May, given the recent strong performance of stock markets. Moreover, we expect airline fares will continue to rise at a decent pace in the next month. Beyond May, the balance of risks is tilted toward the upside as higher energy prices, shortages of semiconductors, and rising transportation costs point to upside risks to the near-term inflation outlook.

Fig. 5: Supercore PCE inflation moderated slightly in April due to temporary weakness in financial service prices

m-o-m supercore PCE inflation

Source: BEA, BLS, Haver, Nomura

Fig. 6: PCE trimmed-mean inflation appears to understate the underlying inflation trend

PCE trimmed-mean inflation: official vs. bias-adjusted

Source: BEA, Dallas Fed, Haver, Nomura

Notably, trimmed-mean PCE — which Chair Warsh has highlighted as an alternative gauge of underlying inflation — eased to 2.3% y-o-y, about a full percentage point below core PCE (Fig. 6). In our [recent report](#), we argued that trimmed-mean PCE may be understating inflation risks, particularly because it has been slow to capture shifts in goods inflation dynamics and the recent change in the skewness of the inflation distribution. In our calculation, PCE trimmed-mean inflation underestimates the underlying inflation by 48bp on a y-o-y basis.

Based on recent Fedspeak, it appears that the measure has not yet gained broad-based support to replace core PCE inflation. One outlier is [Governor Bowman](#), who said she has referred to trimmed-mean PCE over the past year “as an alternative measure of the underlying trend in inflation that can look through large one-time actors affecting a few goods categories.” Bowman also referenced the trimmed-mean PCE measure in a [January 2026 speech](#) as a useful tool to look through increased volatility in recent inflation data (she cited unusually large price increases in small categories driving the rise in core PCE inflation since September 2025).

Fed officials discuss scenarios for hikes

Fedspeak this week reflected a broad-based shift towards a more hawkish tone on the FOMC, even as most officials continue to expect disinflation in coming months as their base case. Some policymakers laid out the timeline during which they would like to see evidence of price pressures fading though, before starting to consider hikes more seriously. We continue to expect no changes to the policy rate through the end of the next year.

[Governor Cook](#) signaled openness to tightening “if the expected disinflation does not appear in a timely manner.” This joins previous comments from [Governor Waller](#) and [Boston Fed president Collins](#) about the possibility of rate hikes if inflation fails to decelerate “soon” (Waller) or “in a timely manner” (Collins). Although Cook indicated that her base case is for rates to remain on hold, this is a notable shift since the “timely” comment has typically been a talking point for FOMC hawks.

[St. Louis Fed president Musalem was also hawkish](#), saying that the real policy rate currently sits below the FOMC’s estimate of long-run neutral. He said if he does not see disinflation “in the next one to two quarters,” that would concern him, which suggests he would not call for an immediate rate hike. Other hawkish FOMC participants remained concerned about inflation risks. Minneapolis Fed President Kashkari stressed upside risks to the inflation outlook and KC Fed President Schmid said he placed “little stock in assuming that the most recent runup in prices is transitory within an acceptable time horizon.”

On the other hand, NY Fed president Williams reiterated his view that policy remains “slightly” restrictive and shared his relatively sanguine inflation outlook that recent inflation pressures tied to the Iran war energy shocks, as well as higher tariffs, should peak in coming months. Similarly, *Governor Bowman* described monetary policy as “moderately” restrictive and attributing elevated inflation readings largely to higher energy prices. Bowman expected core PCE inflation to be only slightly above 2% after removing one-off shocks, with the caveat that broadening price pressures may lead her to shift her view on the balance of risks. Other dovish policymakers remained cautiously optimistic about the inflation outlook. In her Fox Business interview this morning, SF Fed President Daly supported the Fed’s wait-and-see strategy, and expected crude oil prices to come down further, citing the backwardation of crude oil futures. Despite prolonged hostilities in the Middle East, Philly Fed President Paulson delivered a similar speech to the *one on 19 May*, reiterating that monetary policy is “mildly” restrictive and there was no structural change in inflation dynamics.

Skepticism of labor productivity-led disinflation has been a focus for the FOMC recently. Several officials acknowledged AI’s potential to lift longer-run growth, but remain unconvinced that productivity gains can reliably ease inflation in the near term. Cook warned that AI investment could strengthen demand and exacerbate inflation pressures, even as it boosts output, and flagged risks of labor market disruption during the transition. Bowman, by contrast, remained optimistic that productivity growth may offset some inflationary pressure from AI-related supply chain pressures.

St. Louis Fed President Musalem had one of the strongest pushbacks against the productivity-led disinflation argument. He said that evidence of sustained, disinflationary productivity gains remains limited and cautioned that a persistent increase in productivity (his baseline assumption) would likely generate a stronger demand response that offsets supply-side cost relief. Musalem argued that relying on future productivity gains to solve today’s inflation problem would be risky, particularly as the labor market stabilizes.

GDP tracking

Our Q2 GDP tracking estimate stands at 2.4% q-o-q ar from 2.6% *last week*. Our estimate for real final sales to private domestic purchasers now stands at 2.8% q-o-q ar from 2.9% previously.

Downward revisions to inventory investment in Q1 led us to revise up our Q2 estimate due to the base effect. Slower-than-expected inventory investment was partially offset by a narrowing of the advance goods trade deficit in April.

Additionally, real personal spending and core capex goods shipments both came in below our expectations for April, weighing on our estimates for personal consumption and equipment investment. In addition, a downside surprise in new home sales weighed on our estimate for residential investment.

Data Preview

The week ahead

We expect job gains remained solid at 110k in May, and average hourly earnings rebounded.

ISM manufacturing (Monday): We expect the ISM Manufacturing Index ticked up to 53.4 in May from 52.7 in April. The employment index likely ticked up, while supplier delivery times lengthened, reflecting supply chain disruptions due to the Iran war. New orders and production likely ticked down but remained in expansionary territory.

JOLTS job openings (Tuesday): We expect JOLTS job openings fell to 6790k in April from 6866k in March. Our forecast suggests the job openings rate ticked down to 4.10% from 4.15% previously, and the V-U ratio edged lower to 0.92 from 0.95 previously. Data from Indeed and Revelio suggest job openings continued to decline in March and April.

Vehicle sales (Tuesday): We expect vehicle sales rose 16.3mn saar in May from 15.9mn in April. The average interest rate on new vehicles loans ticked down, while average incentive spending by manufacturers picked up, likely boosting sales.

ISM services (Wednesday): We expect the ISM Services Index edged up to 53.9 in May from 53.6 in April. Regional services surveys suggest business activity softened in the month, while new orders rose. The price index remained elevated and the employment index likely returned to expansionary territory.

Fed Beige Book (Wednesday): We expect the Beige Book's description of economic activity remained stable in May, with activity increasing "at a slight to modest pace." Regional Fed surveys throughout the month were mixed, but a majority of surveys showed some improvement in activity. On employment, a range of indicators point to positive momentum in most districts and a limited impact of AI thus far.

We expect the Beige Book will continue to emphasize the impacts of the Iran war, particularly concerns around elevated uncertainty and increasing input costs.

Jobless claims (Thursday): Initial jobless claims rose this week. Continuing claims for the May NFP survey reference week also increased. Claims have remained subdued lately, which is incrementally positive given the trend in recent years when claims rise this time of year.

Nonfarm productivity (Thursday): We expect the final print of nonfarm productivity growth to be revised lower to 0.7% q-o-q ar in Q1 from its preliminary print of 0.8%. Q1 GDP was revised down to 1.6% q-o-q ar from 2.0% previously, and hours were little changed in the quarter. Unit labor costs will likely be revised up to 2.8% q-o-q ar from 2.3%, driven by a deceleration in labor productivity.

Employment report (Friday): We expect job gains remained elevated in May, with headline payrolls rising 110k.

The unemployment rate likely remained steady at 4.3%. Measures of hiring and labor demand have shown tentative signs of a rebound, which we expect can lead to a gradual improvement in the unemployment rate in H2 2026.

Average hourly earnings growth likely rebounded to 0.4% m-o-m. A negative calendar effect and an increase in the average workweek weighed on AHE in April, but underlying wage growth appears elevated, leading us to expect positive payback this month.

US Economic Outlook

We expect the Fed to stay on hold indefinitely due to diminished political pressure, elevated inflation, and hawkish Fed speak.

Economic activity: Growth momentum has accelerated, supported by easing tariff uncertainty, fiscal stimulus from the One Big Beautiful Bill Act, and the lagged impact of Fed rate cuts amid easy financial conditions. *Business investment appears to be broadening beyond the AI sector.* Higher tax refunds and strong payroll income growth has supported consumer spending thus far, despite headwinds from the Iran war. A broad range of indicators point to resilience and tentative signs of reacceleration in the labor market. We expect the unemployment rate will begin to decline, reaching 4.1% by year-end. We think that the US economy remains relatively insulated from *the crude oil price shock due to the Iran war* given the small share of energy-goods consumption in household spending, as well as domestic energy production.

Inflation: Core inflation remains well above the Fed's 2% target, and we believe risks are skewed to the upside. We forecast Q4 2026 core PCE inflation of 3.3% y-o-y. We expect tariff price pressures will diminish in the coming quarters. However, supply shortages caused by AI (memory chips, electricity, etc.) along with higher metal prices could exert new inflationary pressures on goods prices. Wage growth seems to have leveled off around 4%, which is likely to lead to stickiness in supercore service inflation. We expect rent disinflation to continue, but at a very gradual pace.

Policy: *We expect the Fed to remain on hold indefinitely.* Fed Chair Warsh likely remains motivated to ease policy, but recent elevated inflation readings and hawkish Fed speak make us skeptical that he will be able to convince a majority of the Fed to go along with rate cuts. Moreover, support among Fed officials for an easing bias has begun to wane. While hikes are not likely in the near term, the Fed's hesitance to respond to tentative signs of an inflation problem increases the risk that they may end up "behind the curve," needing to hike quickly to re-establish credibility. On tariffs, wider Section 122 exemptions, lower tariff rates, and a greater focus on affordability suggest *limited further escalation* in US trade policy.

Risks: Further escalation of geopolitical risks could lead to a tightening of financial conditions and worsening of the fiscal outlook. Increased political pressures on individual FOMC participants could undermine the Fed's credibility, soliciting sharp market reactions. A bust of the AI boom could lead to material corrections in asset valuations. A continued shortage of memory chips and supply chain disruption due to a protracted Iran war could lead to a second round of goods price increases.

(l) Nomura Fiduciary Research & Consulting Co., Ltd. ('NFR') Tokyo, Japan. (m) Nomura Orient International Securities Co., Ltd ("NOI"), is a majority owned joint venture amongst Nomura Group, Orient International (Holding) Co., Ltd, and Shanghai Huangpu Investment Holding (Group) Co., Ltd. In accordance with the laws of the People's Republic of China ("PRC", excluding Hong Kong, Macau and Taiwan, for the purpose of this document), NOI is licensed in the PRC to provide securities research and investment recommendations and it operates independently from the other members of the Nomura Group; in particular, NOI's interests in PRC securities are not disclosed to, or aggregated with the holdings of, any other Nomura Group entities and the interests in PRC securities of other Nomura Group entities are not disclosed to, or aggregated with the holdings of, NOI. An individual name printed next to NOI on the front page of a research report indicates that individual is employed by NOI to provide research assistance to NIHK under a research partnership agreement. 'NSFSPL' next to an employee's name on the front page of a research report indicates that the individual is employed by Nomura Structured Finance Services Private Limited to provide assistance to certain Nomura entities under inter-company agreements. 'Verdhana' next to an individual's name on the front page of a research

report indicates that the individual is employed by PT Verdhana Sekuritas Indonesia ('Verdhana') to provide research assistance to NIKH under a research partnership agreement and neither Verdhana nor such individual is licensed outside of Indonesia.

THIS MATERIAL IS: (I) FOR YOUR PRIVATE INFORMATION, AND WE ARE NOT SOLICITING ANY ACTION BASED UPON IT; (II) NOT TO BE CONSTRUED AS AN OFFER TO SELL OR A SOLICITATION OF AN OFFER TO BUY ANY SECURITIES IN ANY JURISDICTION WHERE SUCH OFFER OR SOLICITATION WOULD BE ILLEGAL; AND (III) OTHER THAN DISCLOSURES RELATING TO THE NOMURA GROUP, BASED UPON INFORMATION FROM SOURCES THAT WE CONSIDER RELIABLE, BUT HAS NOT BEEN INDEPENDENTLY VERIFIED BY NOMURA GROUP.

Other than disclosures relating to the Nomura Group, the Nomura Group does not warrant, represent or undertake, express or implied, that the document is fair, accurate, complete, correct, reliable or fit for any particular purpose or merchantable, and to the maximum extent permissible by law and/or regulation, does not accept liability (in negligence or otherwise, and in whole or in part) for any act (or decision not to act) resulting from use of this document and related data. To the maximum extent permissible by law and/or regulation, all warranties and other assurances by the Nomura Group are hereby excluded and the Nomura Group shall have no liability (in negligence or otherwise, and in whole or in part) for any loss howsoever arising from the use, misuse, or distribution of this material or the information contained in this material or otherwise arising in connection therewith.

Opinions or estimates expressed are current opinions as of the original publication date appearing on this material and the information, including the opinions and estimates contained herein, are subject to change without notice. The Nomura Group, however, expressly disclaims any obligation, and therefore is under no duty, to update or revise this document. Any comments or statements made herein are those of the author(s) and may differ from views held by other parties within Nomura Group. Clients should consider whether any advice or recommendation in this report is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The Nomura Group does not provide tax advice.

The Nomura Group, and/or its officers, directors, employees and affiliates, may, to the extent permitted by applicable law and/or regulation, deal as principal, agent, or otherwise, or have long or short positions in, or buy or sell, the securities, commodities or instruments, or options or other derivative instruments based thereon, of issuers or securities mentioned herein. The Nomura Group companies may also act as market maker or liquidity provider (within the meaning of applicable regulations in the UK) in the financial instruments of the issuer. Where the activity of market maker is carried out in accordance with the definition given to it by specific laws and regulations of the US or other jurisdictions, this will be separately disclosed within the specific issuer disclosures.

This document may contain information obtained from third parties, including, but not limited to, ratings from credit ratings agencies such as Standard & Poor's. The Nomura Group hereby expressly disclaims all representations, warranties or undertakings of originality, fairness, accuracy, completeness, correctness, merchantability or fitness for a particular purpose with respect to any of the information obtained from third parties contained in this material or otherwise arising in connection therewith, and shall not be liable (in negligence or otherwise, and in whole or in part) for any direct, indirect, incidental, exemplary, compensatory, punitive, special or consequential damages, costs, expenses, legal fees, or losses (including lost income or profits and opportunity costs) in connection with any use or misuse of any of the information obtained from third parties contained in this material or otherwise arising in connection therewith. Reproduction and distribution of third-party content in any form is prohibited except with the prior written permission of the related third-party. Third-party content providers do not, express or implied, guarantee the fairness, accuracy, completeness, correctness, timeliness or availability of any information, including ratings, and are not in any way responsible for any errors or omissions (negligent or otherwise), regardless of the cause, or for the results obtained from the use or misuse of such content. Third-party content providers give no express or implied warranties, including, but not limited to, any warranties of merchantability or fitness for a particular purpose or use. Third-party content providers shall not be liable (in negligence or otherwise, and in whole or in part) for any direct, indirect, incidental, exemplary, compensatory, punitive, special or consequential damages, costs, expenses, legal fees, or losses (including lost income or profits and opportunity costs) in connection with any use or misuse of their content, including ratings. Credit ratings are statements of opinions and are not statements of fact or recommendations to purchase hold or sell securities. They do not address the suitability of securities or the suitability of securities for investment purposes, and should not be relied on as investment advice. Any MSCI sourced information in this document is the exclusive property of MSCI Inc. ('MSCI'). Without prior written permission of MSCI, this information and any other MSCI intellectual property may not be duplicated, reproduced, re-disseminated, redistributed or used, in whole or in part, for any purpose whatsoever, including creating any financial products and any indices. This information is provided on an "as is" basis. The user assumes the entire risk of any use made of this information. MSCI, its affiliates and any third party involved in, or related to, computing or compiling the information hereby expressly disclaim all representations, warranties or undertakings of originality, fairness, accuracy, completeness, correctness, merchantability or fitness for a particular purpose with respect to any of this material or the information contained in this material or otherwise arising in connection therewith. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates or any third party involved in, or related to, computing or compiling the information have any liability (in negligence or otherwise, and in whole or in part) for any damages of any kind. MSCI and the MSCI indexes are services marks of MSCI and its affiliates.

The intellectual property rights and any other rights, in Russell/Nomura Japan Equity Index belong to Nomura Fiduciary Research & Consulting Co., Ltd. ("NFR") and FTSE Russell ("Russell"). NFR and Russell do not guarantee fairness, accuracy, completeness, correctness, reliability, usefulness, marketability, merchantability or fitness of the Index, and do not account for business activities or services that any index user and/or its affiliates undertakes with the use of the Index.

Investors should consider this document as only a single factor in making their investment decision and, as such, the report should not be viewed as identifying or suggesting all risks, direct or indirect, that may be associated with any investment decision. Nomura Group produces a number of different types of research product including, among others, fundamental analysis and quantitative analysis; recommendations contained in one type of research product may differ from recommendations contained in other types of research product, whether as a result of differing time horizons, methodologies or otherwise. The Nomura Group publishes research product in a number of different ways including the posting of product on the Nomura Group portals and/or distribution directly to clients. Different groups of clients may receive different products and services from the research department depending on their individual requirements.

Figures presented herein may refer to past performance or simulations based on past performance which are not reliable indicators of future or likely performance. Where the information contains an expectation, projection or indication of future performance and business prospects, such

forecasts may not be a reliable indicator of future or likely performance. Moreover, simulations are based on models and simplifying assumptions which may oversimplify and not reflect the future distribution of returns. Any figure, strategy or index created and published for illustrative purposes within this document is not intended for "use" as a "benchmark" as defined by the European Benchmark Regulation. Certain securities are subject to fluctuations in exchange rates that could have an adverse effect on the value or price of, or income derived from, the investment.

With respect to Fixed Income Research: Recommendations fall into two categories: tactical, which typically last up to three months; or strategic, which typically last from 6-12 months. However, trade recommendations may be reviewed at any time as circumstances change. 'Stop loss' levels for trades are also provided; which, if hit, closes the trade recommendation automatically. Prices and yields shown in recommendations are taken at the time of submission for publication and are based on either indicative Bloomberg, LSEG or Nomura prices and yields at that time. The prices and yields shown are not necessarily those at which the trade recommendation can be implemented.

The securities described herein may not have been registered under the US Securities Act of 1933 (the '1933 Act'), and, in such case, may not be offered or sold in the US or to US persons unless they have been registered under the 1933 Act, or except in compliance with an exemption from the registration requirements of the 1933 Act. Unless governing law permits otherwise, any transaction should be executed via a Nomura entity in your home jurisdiction.

This document has been approved for distribution in the UK as investment research by Nlplc. Nlplc is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority. Nlplc is a member of the London Stock Exchange. This document does not constitute a personal recommendation within the meaning of applicable regulations in the UK, or take into account the particular investment objectives, financial situations, or needs of individual investors. This document is intended only for investors who are 'eligible counterparties' or 'professional clients' for the purposes of applicable regulations in the UK, and may not, therefore, be redistributed to persons who are 'retail clients' for such purposes.

This document has been approved for distribution in the European Economic Area as investment research by Nomura Financial Products Europe GmbH ("NFPE"). NFPE is a company organized as a limited liability company under German law registered in the Commercial Register of the Court of Frankfurt/Main under HRB 110223. NFPE is authorized and regulated by the German Federal Financial Supervisory Authority (BaFin).

This document has been approved by Nlplc, which is regulated by the Hong Kong Securities and Futures Commission, for distribution in Hong Kong by Nlplc. This document is intended only for investors who are 'professional investors' for the purposes of applicable regulations in Hong Kong and may not, therefore, be redistributed to persons who are not 'professional investors' for such purposes.

This document has been approved for distribution in Australia by NAL, which is authorized and regulated in Australia by the ASIC.

This document has also been approved for distribution in Malaysia by NSM.

In Singapore, this document has been distributed by NSL, an exempt financial adviser as defined under the Financial Advisers Act (Chapter 110), among other things, and regulated by the Monetary Authority of Singapore. NSL may distribute this document produced by its foreign affiliates pursuant to an arrangement under Regulation 32C of the Financial Advisers Regulations. This document is intended for accredited, expert or institutional investors as defined by the Securities and Futures Act (Chapter 289). Where the recipient of this document is not an accredited, expert or institutional investor, NSL accepts legal responsibility for the contents of this document in respect of such recipient only to the extent required by law. Recipients of this document in Singapore should contact NSL in respect of matters arising from, or in connection with, this document. THIS DOCUMENT IS INTENDED FOR GENERAL CIRCULATION. IT DOES NOT TAKE INTO ACCOUNT THE SPECIFIC INVESTMENT OBJECTIVES, FINANCIAL SITUATION OR PARTICULAR NEEDS OF ANY PARTICULAR PERSON. RECIPIENTS SHOULD TAKE INTO ACCOUNT THEIR SPECIFIC INVESTMENT OBJECTIVES, FINANCIAL SITUATION OR PARTICULAR NEEDS BEFORE MAKING A COMMITMENT TO PURCHASE ANY SECURITIES, INCLUDING SEEKING ADVICE FROM AN INDEPENDENT FINANCIAL ADVISER REGARDING THE SUITABILITY OF THE INVESTMENT, UNDER A SEPARATE ENGAGEMENT, AS THE RECIPIENT DEEMS FIT. Unless prohibited by the provisions of Regulation S of the 1933 Act, this material is distributed in the US, by NSI, a US-registered broker-dealer, which accepts responsibility for its contents in accordance with the provisions of Rule 15a-6, under the US Securities Exchange Act of 1934. The entity that prepared this document permits its separately operated affiliates within the Nomura Group to make copies of such documents available to their clients.

This document has not been approved for distribution to persons other than 'Authorised Persons', 'Exempt Persons' or 'Institutions' (as defined by the Capital Markets Authority) in the Kingdom of Saudi Arabia ('Saudi Arabia') or a 'Market Counterparty' or a 'Professional Client' (as defined by the Dubai Financial Services Authority) in the United Arab Emirates ('UAE') or a 'Market Counterparty' or a 'Business Customer' (as defined by the Qatar Financial Centre Regulatory Authority) in the State of Qatar ('Qatar') by Nomura Saudi Arabia, Nlplc or any other member of the Nomura Group, as the case may be. Neither this document nor any copy thereof may be taken or transmitted or distributed, directly or indirectly, by any person other than those authorised to do so into Saudi Arabia or in the UAE or in Qatar or to any person other than 'Authorised Persons', 'Exempt Persons' or 'Institutions' located in Saudi Arabia or a 'Market Counterparty' or a 'Professional Client' in the UAE or a 'Market Counterparty' or a 'Business Customer' in Qatar. Any failure to comply with these restrictions may constitute a violation of the laws of the UAE or Saudi Arabia or Qatar.

For report with reference of TAIWAN public companies or authored by Taiwan based research analyst:

THIS DOCUMENT IS SOLELY FOR REFERENCE ONLY. You should independently evaluate the investment risks and are solely responsible for your investment decisions. NO PORTION OF THE REPORT MAY BE REPRODUCED OR QUOTED BY THE PRESS OR ANY OTHER PERSON WITHOUT WRITTEN AUTHORIZATION FROM NOMURA GROUP. Pursuant to Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers and/or other applicable laws or regulations in Taiwan, you are prohibited to provide the reports to others (including but not limited to related parties, affiliated companies and any other third parties) or engage in any activities in connection with the reports which may involve conflicts of interests. INFORMATION ON SECURITIES / INSTRUMENTS NOT EXECUTABLE BY NOMURA INTERNATIONAL (HONG KONG) LTD., TAIPEI BRANCH IS FOR INFORMATIONAL PURPOSES ONLY AND IS NOT BE CONSTRUED AS A RECOMMENDATION OR A SOLICITATION TO TRADE IN SUCH SECURITIES / INSTRUMENTS.

This material may not be distributed in Indonesia or passed on within the territory of the Republic of Indonesia or to persons who are Indonesian citizens (wherever they are domiciled or located) or entities of or residents in Indonesia in a manner which constitutes a public offering under the

laws of the Republic of Indonesia. The securities mentioned in this document may not be offered or sold in Indonesia or to persons who are citizens of Indonesia (wherever they are domiciled or located) or entities of or residents in Indonesia in a manner which constitutes a public offering under the laws of the Republic of Indonesia.

An individual name printed next to NOI on the front page of a research report indicates that this document is a translation of a research report issued by NOI in the PRC. In all other cases, this document is prepared by Nomura Group or its subsidiary or affiliate (collectively, "Offshore Issuers") that is not licensed in the PRC to provide securities research. This research report is not approved or intended to be circulated in the PRC. The A-share related analysis (if any) is not produced for any persons located or incorporated in the PRC. The recipients should not rely on any information contained in this research report in making investment decisions and Offshore Issuers take no responsibility in this regard.

NO PART OF THIS MATERIAL MAY BE (I) COPIED, PHOTOCOPIED, REPRODUCED OR DUPLICATED IN ANY FORM, BY ANY MEANS; OR (II) REDISSEMINATED, REPUBLISHED OR REDISTRIBUTED WITHOUT THE PRIOR WRITTEN CONSENT OF A MEMBER OF THE NOMURA GROUP. If this document has been distributed by electronic transmission, such as e-mail, then such transmission cannot be guaranteed to be secure or error-free as information could be intercepted, corrupted, lost, destroyed, arrive late or incomplete, or contain viruses. The sender therefore does not accept liability (in negligence or otherwise, and in whole or in part) for any errors or omissions in the contents of this document, which may arise as a result of electronic transmission. If verification is required, please request a hard-copy version.

Nomura Securities Co., Ltd.

Financial instruments firm registered with the Kanto Local Finance Bureau (registration No. 142)

Member associations: Japan Securities Dealers Association; Investment Management Association of Japan; The Financial Futures Association of Japan; Type II Financial Instruments Firms Association; and Japan Security Token Offering Association.
